GOLDEN SHEAF AWARD
NOMINEE - 2014 Yorkton
Film Festival

Teaching Moment: Social Studies/Aboriginal Education/Character Education/Language Arts & Primary Literacy Skills
Canada's aboriginal people use stories as a way to pass on traditions, rituals, and messages about respect, honesty, loyalty and trust. These stories can be used to increase listening skills, foster communication and create bonds.

Grades Preschool - 1 2013 11 min each Louis Says Productions Inc.

Louis is an elder, whose mission in life is to help people in his community, but he is getting older and it's getting harder for him to continue with his mission. Louis decides to recruit a boy named Randy to help him with his work. Every day Randy arrives at Louis' house and receives instructions for a task that he has to complete, but there's one problem: Louis speaks mostly Cree and little English while Randy only speaks English. How can Randy help Louis if he can't understand his instructions?

In order for Randy to fully understand Louis' instructions, he first needs to learn what the Cree words in the instructions mean. However, Randy is a bit impatient, and he is tempted to complete the task without knowing the meaning of the Cree words. Luckily with the help of people around the community who can speak both Cree and English, Randy would eventually be able to figure out the meaning of the words and complete the task.

From taking a gift to a sick boy, to delivering fabric for a quilt, to picking up medicinal herbs, each episode in Louis Says features stories that resonate with children, and reinforce important values such as patience, respecting elders, helping others and teamwork.

SPECIAL SERIES PRICE (8 DVDs/2 episodes on each) - ONLY \$720- a saving of \$72- Series Product #LS0000

Individual programs: \$99 each

Streaming Price (3 year term): Single School – K-12: \$149 each

Dare to Get the Bear

Louis uses both English and Cree words to tell Randy that Emily's son is sick and that he needs to get him a maskohkân (teddy bear) to make him feel better. Randy thinks maskohkân means a bear's fang. Mr. Thompson tells Randy that maskohkân means teddy bear and not a bear's fang.

Lesson: Kids should always avoid doing things that can put them in danger.

Beading Stars

Louis tells Randy that Mrs. Charles needs mekisuk (beads). Katie thinks the word means berries. Randy, Katie and Anne go to pick up berries for Mrs. Charles. When they arrive at Mrs. Charles' house they learn that the word for berries is menisu not mekisuk which means beads.

Lesson: Not everyone likes the same things. Diversity and self-expression are an important part of life.

#LS0001--NR15 \$99

No Time for Stories

Louis asks Randy to help Mr. Thompson collect the medicinal plant known as rat root. He also tells him to bring muskimot (a bag) with him. Randy thinks that muskimot means hiking shoes. He borrows Anne's hiking shoes. The hiking shoes Randy is wearing are too small and his feet begin to hurt.

Lesson: There is time for fun, and there is time to focus on your chores.

Stick to the Plan

Louis tells Randy that he needs to deliver kinowacigosa (long wooden sticks) to Mr. Thompson, and cimacigosa (short wooden sticks) to Mr. Charles. Randy begins to wonder which wooden sticks are for Mr. Charles and which ones are for Mr. Thompson. When Randy arrives at Mr. Thompson's house he finds out that he has brought the wrong sticks.

Lesson: Teamwork can help get things done faster and better.

#LS0002-NR15 \$99

The Big Pie Sale

Louis tells Randy that he has to deliver kuhkithuw (all) the blueberries to Mrs. Charles. Randy picks up only one pail. When Randy arrives to Mrs. Charles' house with one pail of blueberries she tells him that she's having a pie sale, and the one pail of blueberries isn't enough for the number of pies she's going to bake.

Lesson: If you don't get it right the first time, you can try again until you get it right.

Colours of the Quilt

Louis tells Randy he needs to get Mrs. Charles some mihkwêkin (red fabric), sîpihkwêkin (blue fabric), osâwêkin (yellow fabric). Randy doesn't know what those words mean. Randy and Katie mistakenly think that the Cree words Louis told Randy mean red, blue and yellow or orange skirts instead of red, blue and yellow fabric.

Lesson: Kids should listen carefully and patiently to what adults have to say.

#LS0003-NR15 \$99

Goodbye Clutter

Louis gives Randy a sack and instructs him to collect uyanisa and metuwakuna (clothes and toys) for donations. Anne tells Randy that the words mean clothes and toys and suggests that he donates some of the clothes and toys that he doesn't use anymore.

Lesson: You are never too young to start giving back.

Count on Anne

Louis gives Randy a large bannock. He tells Randy to kakeeskis (cutting into slices) and give bannock to Mr. Thompson, Mr. and Mrs. Charles, Katie and Anne. Randy first heads to Anne's house. Anne tells Randy the word kakeeskis means cutting into slices. Randy, Anne and Katie count the bannock slices from one to five in Cree.

Lesson: Breaking bread and sharing it with others is an important tradition.

#LS0004-NR15 \$99

The Birdhouse

When Randy arrives at Louis' house, he's given the task of the day, which is to get pitheses (bird) food for Mr. Charles. Katie thinks pitheses means fish. When they get to Mr. Charles' house, the kids find him outside, building a bird house. Mr. Charles tells them that he needs bird food, not fish food.

Lesson: It's important to take care of our pets.

Lost and Found

Louis tells Randy that he needs to find a box for wanihta ikwa miska (lost and found) for the community centre. Katie thinks wanihta ikwa miska means hide and seek. Randy thinks that Louis wants to play hide and seek the next time there's an event at the community centre, and he wants a box to hide in.

Lesson: When we find something that belongs to someone else, we put it in a lost and found box.

#LS0005-NR15 \$99

Digging for Dinosaurs

Louis tells Randy that Emily's son wants a dinosaur musinahikan (book). Randy thinks that, since dinosaurs are extinct, Louis wants him to find dinosaur bones. He invites Katie and Anne to help him with the task. The kids start digging for bones, but all they find is a bone that Osky buried.

Lesson: Reading books gives us both knowledge and joy

Some Kind of Syrup

Louis tells Randy to get siwakamisikan (birch syrup) for Mrs. Charles. Randy meets his friend Katie, who tells him that siwakamisikan is a special type of syrup, but he doesn't know exactly which kind. Randy assumes that siwakamisikan means cough syrup. Mrs. Charles almost poured the cough syrup on her pancakes.

Lesson: Kids should never take medications without adult supervision.

#LS0006-NR15 \$99

Skipping the Rope

Louis asks Randy to take peminuhkwan (rope) to Mr. Thompson. Katie tells Randy that she heard her sister saying the word peminuhkwan when she was skipping the rope. Randy thinks that Mr. Thompson needs a skipping rope, but what Mr. Thompson needs is a rope to hang his hammock.

Lesson: Exercising is important to keep our bodies healthy.

Car Trouble

Louis tells Randy to help Mr. Thompson kitchistin (clean) his car. Randy meets Katie, who thinks kitchistin the car means, fix the car. The kids decide to ask Mr. Charles for tools, and then go to Mr. Thompson's house. Mr. Thompson tells Randy that his car is working fine, and that what he needs to do is clean it.

Lesson: Cars, tools and machines are not toys.

#LS0007-NR15 \$99

A Paint Job

Louis tells Randy that Mrs. Charles is working on a sopekahikewin (a painting), and she needs paint and brushes. Katie thinks sopekahikewin means painting the walls. Katie thinks Mr. Thompson might have some leftover paint and brushes he can give to Mrs. Charles. Mrs. Charles tells Randy that she is working on a painting, and not painting the walls.

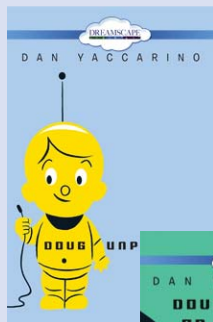

Lesson: Art is something that we can all enjoy.

Let it Snow

Louis tells Randy that Mrs. Charles needs an extension cord to plug her konowi-mechiwin (snow cone) machine. Randy and Katie think Mrs. Charles needs an extension cord for a snow machine. They look for a long extension cord that can reach all the way to Mrs. Charles backyard. Mrs. Charles tells Randy that all she needs it to plug in her snow cone machine in the kitchen.

Lesson: The spirit of holidays can be felt all throughout the year.

#LS0008-NR15 \$99

Doug Unplugged

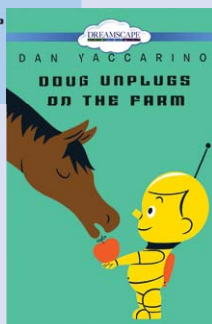

Grades JK – 3 2013 8 min Dreamscape

By Dan Yaccarino

Illustrated By Dan Yaccarino

Doug Unplugged, is a cute story about a young robot boy who learns that disconnecting and going outside can lead to wonderful adventures.

#211111-NR15 \$69.95 Streaming Price (3 year term): Single School – K-12: \$105

Doug Unplugs on the Farm

JK-3 2014 10 min Dreamscape

A high-tech robot boy enjoys a day of low-tech fun on the farm.

By Dan Yaccarino

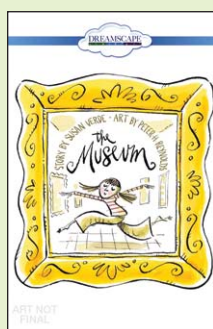

Illustrated By Dan Yaccarino

Doug Unplugs on the Farm is a lively celebration of farm life and the value of hands-on learning that will encourage kids to go screen-free and explore the real world! A terrific companion to Doug Unplugged.

#211125-NR15 \$69.95 Streaming Price (3 year term): Single School – K-12: \$105

Teaching Moment: These stories advocate for unplugging in order to enjoy the world around us. Pair a reading of *Doug Unplugged* and *Doug Unplugs on the Farm* with a field trip. Get out there and observe what's going on in your school, schoolyard, and community.

The Museum

Grades JK -3 2014 8 min

Dreamscape

By Susan Verde

Illustrated By Peter H. Reynolds

When I see a work of art, something happens in my heart! As a little girl tours and twirls through the halls of the art museum, she finds herself on an exciting adventure. Each piece of art evokes something new inside of her: silliness, curiosity, joy, and

ultimately inspiration. When confronted with an empty white canvas, she is energized to create and express herself - which is the greatest feeling of all. With exuberant illustrations by Peter H. Reynolds, *The Museum* playfully captures the many emotions experienced through the power of art, and each child's unique creative process.

#211126-NR15 \$69.95

Streaming Price (3 year term): Single School – K-12: \$105

Teaching Moment: Dance & Physical Education, Visual Art/English/Language Arts

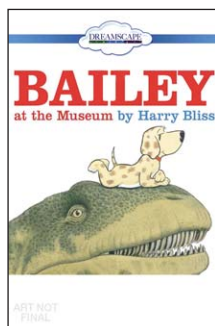

Our character pauses in a quiet gallery and decides to “analyze the whos and whats and wheres and whys” in an attempt to construct meaning from the work she is viewing. Lead students in a basic art analysis lesson by presenting a realistic work of art and asking openended questions that encourage them to move beyond the “I like it/I don’t like it level.” Questions as basic as, “What do you see?” can lead in many different directions pertaining to colour, line, mood, composition, and theme. Give students time to let their eyes and brain process the visual information; then additional time to look again. What they see at first glance will gradually open up to more visual discoveries.

Bailey at the Museum

Grades K-3 2014 8 min Dreamscape

By Harry Bliss

Illustrated By Harry Bliss

Bailey is very excited about the school trip to the Museum of Natural History. After all, he loves to dig up bones even more than an archaeologist! And besides bones, there's lots of fun to be had with tepees, totem poles, and dinosaur skeletons. Bailey's classmates never know what will happen next: maybe that's why the museum guard becomes Bailey's special

partner.

#211127-NR15 \$69.95

Streaming Price (3 year term): Single School – K-12: \$105

Teaching Moment: Behaviour/Social Studies

A great video to show young students preparing for their first field trip. Teaches proper and respectful behaviour to be used in museums or other public settings.

Twinkle, Twinkle, Little Star & Star Light, Star Bright

Grades Preschool-3 2014 5 min

Dreamscape

By Melissa Everett

Illustrated By Oksana Pasishnychenko

Cuddle up with your little one and laugh along with these fantastical re-imaginings of familiar nursery rhymes. You will fall in love with the adorable illustrations and sweet verse in these charming versions of the

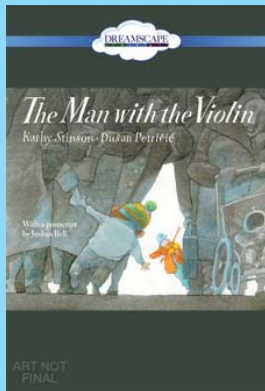

classic children's rhymes.

#211128-NR15 \$69.95

Streaming Price (3 year term): Single School – K-12: \$105

**Canadian author,
Kathy Stinson**

The Man with the Violin

Grades K-4 2014 8 min Dreamscape

By Kathy Stinson

Illustrated By Dusan Petricic

Dylan is someone who notices things. His mom is someone who doesn't. So try as he might, Dylan can't get his mom to listen to the man playing the violin in the subway station. But Dylan is swept away by the soaring and swooping notes that fill the air as crowds of oblivious people rush by. With the beautiful music in his head all day long, Dylan can't forget the violinist, and finally succeeds in making his mother stop and listen, too. This video is based on the true story of Joshua Bell, the renowned violinist who famously took his instrument down into the Washington D.C. subway for a free concert. More than a thousand commuters rushed by him, but only seven stopped to listen for more than a minute.

#211129-NR15 \$69.95 Streaming Price (3 year term): Single School – K-12: \$105

Teaching Moment:
How many beautiful experiences are lost on us as we rush

through our days? Perhaps show the video to students twice, the second time, having them carefully take notice of the things that Dylan notices as compared to what his mother misses.

**Canadian author,
Robert Munsch**

The Paper Bag Princess

Grades JK -3 2014 8 min Dreamscape

By Robert Munsch

Illustrated By Michael Martchenko

Based on the bestselling picture book that sold over a million copies in print!

Princess Elizabeth is slated to marry Prince Ronald when a dragon attacks the castle and kidnaps Ronald. In resourceful and humorous fashion, Elizabeth finds the dragon, outsmarts him, and rescues Ronald - who is less than pleased at her un-princess-like appearance.

#211130-NR15 \$69.95

Streaming Price (3 year term): Single School – K-12: \$105

Teaching Moment: The Paper Bag Princess is a fun story that empowers children to think through conflict situations. Use as a springboard for classroom discussion on true friendship, bravery and determination.

The Wizard of Oz

Grades JK-3 2014 10 min Dreamscape

By Maggie Blossom

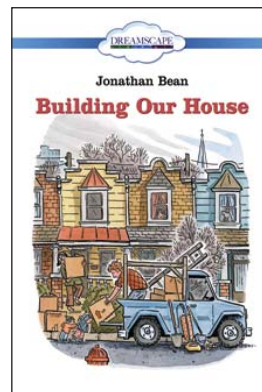

Illustrated By Asha Pearce

You just never know when a twister is going to whisk you off to a magical land of witches, munchkins, and great adventures with new friends. One minute Dorothy and her dog Toto were home in Kansas, and the next they were teaming up with the Cowardly Lion, Tin Man, and Scarecrow to save the magical land of Oz from the Wicked Witch. Best of all, they realized how brave, loving, and kind each of

their friends are, and that no matter how wonderful an adventure may be, there just isn't any place as wonderful as home.

#211131-NR15 \$69.95

Streaming Price (3 year term): Single School – K-12: \$105

Building Our House

Grades JK – 3 2013

8 min Dreamscape

By Jonathan Bean

Illustrated By Jonathan Bean

Mom and Dad are going to make the new house themselves, from the ground up. From empty lot to finished home, every stage of their year-and-a-half-long building

project is here. And at every step their lucky kids are watching and getting their hands dirty, in page after page brimming with machines, vehicles, and all kinds of house-making activities! Based on his picture book, this is Jonathan Bean's retelling of his own family's true experience, as he imagines it through the eyes of his older sister.

#211113-NR15 \$69.95

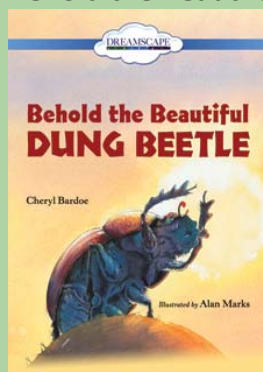

Streaming Price (3 year term): Single School – K-12: \$105

Teaching Moment: Some of the traditions and celebrations from the construction industry shown in this book could be explored with children.

The frame-raising party depicted is reminiscent of historical portrayals of communities gathering together to help one another build structures and then celebrating their work. Bean also included the "topping out" tradition of timber frame construction where an evergreen tree is placed on the uppermost beam of a house signaling the structure has reached its height in his house framing images. The moving in celebration or "house-warming" tradition could be discussed too.

Behold the Beautiful Dung Beetle

Grades K – 4 2014 8 min Dreamscape
 By Cheryl Bardoe
 Illustrated By Alan Marks
 Somewhere in the world right now an animal has just lightened its load. The dung beetles can smell it. They race to the scene by the thousands, intent on snagging their share of the precious poop. Think dung is gross? For a dung beetle, it's food, drink, and fuel for new life. Think dung beetles are disgusting? Take a closer look, and discover the beauty of these diamonds in the dung.

#211119-NR15 \$69.95

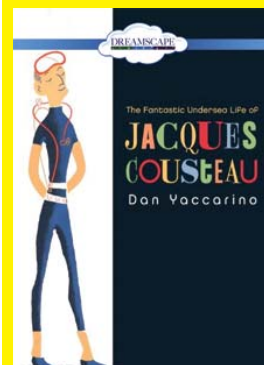

Streaming Price (3 year term): Single School – K-12: \$105

Teaching Moment: Science - Insects/Life Cycles/ Habitats/Reducing & Reusing

Presents the life and habits of the dung beetle which obtains food, water, and shelter from the droppings of other animals.

The Fantastic Undersea Life of Jacques Cousteau

Grades K – 4 2014 10 min Dreamscape
 By Dan Yaccarino
 Illustrated By Dan Yaccarino
 Jacques Cousteau was the world's ambassador of the oceans. His popular TV series brought whales, otters, and dolphins right

into people's living rooms. Discover the man behind the snorkel in Dan Yaccarino's exciting biography!

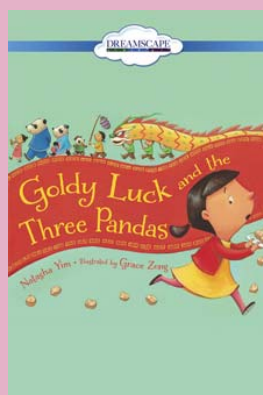

#211118-NR15 \$69.95

Streaming Price (3 year term): Single School – K-12: \$105

Teaching Moment: Science

Young viewers receive a gentle lesson on the fragility of oceans and undersea life.

Goldy Luck and the Three Pandas

Grades JK – 3 2014 8 min Dreamscape
 By Natasha Yim
 Illustrated By Grace Zong

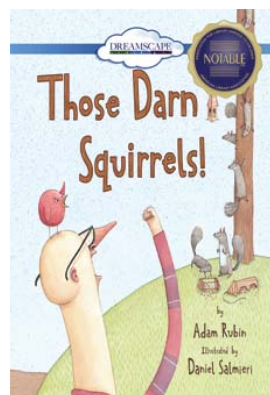

Goldy Luck, not an especially lucky child, is awoken by her mother one Chinese New Year and sent to the neighbours' to wish them "Kung Hei Fat Choi" and deliver a plate of turnip cakes. Tired and hungry, and thinking of the neighbour boy who doesn't share, she is reluctant, but she takes her mother's advice seriously: To avoid bad luck in the new year, she must resolve arguments and be kind.

#211117-NR15 \$69.95 Streaming Price (3 year term): Single School – K-12: \$105

Teaching Moment: Social Studies & History

This fractured fairy tale presents an opportunity to introduce students to rich vocabulary relating to the Chinese culture and customs.

Those Darn Squirrels!

Grades JK – 3 2013 8 min Dreamscape
 By Adam Rubin
 Illustrated By Daniel Salmieri

Old Man Fookwire has a plan. He'll build some birdfeeders and fill them with yummy seeds and berries. That way, the wild birds he loves so much will stick around for the winter - instead of flying south. But there are other hungry creatures in the forest, and they have plans, too... Those

darn squirrels! In this whimsical picture book, a grumpy old man and some mischievous squirrels match wits - with hilarious results.

#211106-NR15 \$69.95

Streaming Price (3 year term): Single School – K-12: \$105

Those Darn Squirrels and the Cat Next Door

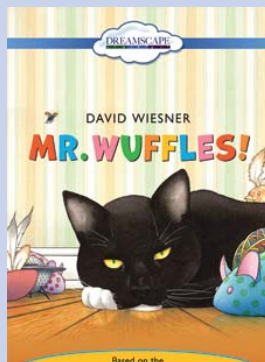

Grades JK – 3 2013 8 min Dreamscape
 By Adam Rubin
 Illustrated By Daniel Salmieri

All is calm in old man Fookwire's yard until new neighbours - Little Old Lady Hu and her cat, Muffins - move in next door. Muffins is one mean dude! He terrorizes the birds, interrupts Fookwire's painting, and ties the squirrels' tails together.

Fookwire is upset, but not nearly as upset as the squirrels, who devise an ingenious plan to stop Muffins cold. In this hilarious follow-up to *Those Darn Squirrels!*, the tongue-in-cheek text is perfectly complemented by the quirky, inventive illustrations.

#211107-NR15 \$69.95

Streaming Price (3 year term): Single School – K-12: \$105

Mr. Wuffles!

Grades JK – 3 2013 8 min Dreamscape

By David Wiesner

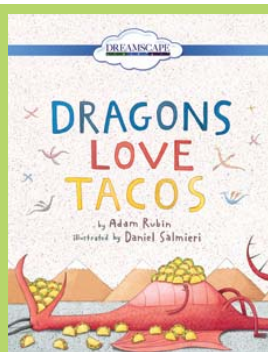

Illustrated By David Wiesner

In a near wordless masterpiece that could only have been devised by David Wiesner, a cat named Mr. Wuffles doesn't care about toy mice or toy goldfish. He's much more interested in playing with a little spaceship full of actual aliens. A humorous exploration of cooperation between aliens and insects, and of the universal nature of communication involving symbols, "cave" paintings, and gestures of friendship.

#211114-NR15 \$69.95 Streaming Price (3 year term): Single School – K-12: \$105

Teaching Moment: As in many of David Wiesner's stories, things are not always what they seem. What looks like a cat toy is actually a spaceship!—a world inside a world. Ask students to choose an ordinary object to think and write about in this extraordinary way—who or what might inhabit the pencil sharpener? What if the basketball is a planet populated by creatures too tiny to see? What if the school bus is actually the toy of a giant?

Dragons Love Tacos

Grades JK – 3 2013 6 min

Dreamscape

By Adam Rubin

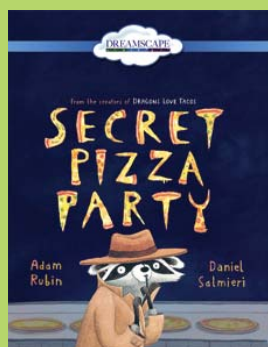

Illustrated By Daniel Salmieri

Dragons love tacos. They love chicken tacos, beef tacos, great big tacos, and teeny tiny tacos. So if you want to lure a bunch of dragons to your party, you should definitely serve tacos. Buckets and buckets of tacos. Unfortunately,

where there are tacos, there is also salsa. And if a dragon accidentally eats spicy salsa...oh, boy. You're in red-hot trouble. The award-winning team behind *Those Darn Squirrels!* has created an unforgettable, laugh-until-salsa-comes-out-of-your-nose tale of new friends and the perfect snack.

#211115-NR15 \$69.95

Streaming Price (3 year term): Single School – K-12: \$105

Secret Pizza Party

Grades JK – 3 2013 6 min

Dreamscape

By Adam Rubin

Illustrated By Daniel Salmieri

How does Raccoon love pizza? Oh, let him count the ways. He loves the gooey cheesy-ness, salty pepperoni-ness, sweet sweet tomato-ness, and of course the crispy crunchity crust. But someone is always chasing poor

Raccoon away from his favorite food with a broom! What's a hungry raccoon to do? Plan an elaborate secret pizza party, of course! But shhh! It's a secret! In fact, you should probably just forget I told you. Nope, no secret pizza party happening here. You didn't already tell all your friends, did you? Uh oh...

#211116-NR15 \$69.95

Teaching Moment: Writing

Write about your favourite food. Write a how-to piece that describes how to make your custom pizza. Give your pizza a unique name.

Lawn to Lawn

Preschool to Grades 3 2014

10 min Dreamscape

By Dan Yaccarino

Illustrated By Dan Yaccarino

Not everyone loves lawn ornaments. But Pearl was different. Pearl was their friend - the only human who knew they were real. So when Pearl's family moves and (shockingly!) leaves their pink flamingo, deer, gnome,

and lawn jockey behind, Flo, Betty, Norm, and Jack know what they must do. They must find Pearl no matter how long and perilous the journey. Through cities and suburbs, over mountains and through swamps, the ornaments make their dangerous way. They survive storms and menacing gargoyles. They get directions from weather vanes and other statuary. And always, always, they must avoid the dreaded trash truck!

Streaming Price (3 year term): Single School – K-12: \$105

Teaching Moment: Students can be challenged with the book because there are large words that are introduced such as suspected, creature tenacious and determined. The student will be able to use their phonological awareness to sound out the words. After the reading the students and teacher could discuss the words they did not understand.

One is a Feast for a Mouse: A Thanksgiving Tale

Grades K-3 2014 10 min Dreamscape

By Judy Cox

Illustrated By Jeffrey Ebbeler

The Thanksgiving feast is over. Leftover turkey and pumpkin pie litter the table. Mouse peeps out of his hidey-hole and spots a small green pea, the perfect feast for one mouse. Yes, one green pea, one red cranberry, one plate of mashed potatoes, and one roasted turkey, that should make a very fine feast for Mouse. But can he get it all back to his hidey-hole?

#211136-NR15 \$69.95

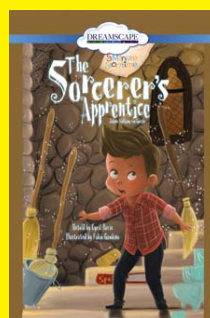

Streaming Price (3 year term): Single School – K-12: \$105

Teaching Moment: Feasts Around the World

After reading the story, discuss the traditional feast the family ate and compare it to the meagre feast of the mouse. Discuss the difference between traditional North American

feasts and feasts of other cultures. In small groups assign the students to research different feasts from around the world online or in library books. Some suggestions for searching are Hanukkah, Kwanzaa, Diwali, etc. After the children have researched the feast day, have them illustrate and write information explaining their holiday. Have students present their findings to each other or to family, friends, and guests as part of a school feast.

The Sorcerer's Apprentice

Grades K-3 2014

10 min Dreamscape

By Cyril Bavis

Illustrated By Fabio Gambino

Have you ever wished that instead of having to do your chores all by yourself that someone - or something - would help you get them done faster? That's exactly the way the

sorcerer's apprentice felt one day when the sorcerer left him all alone to clean the castle - so he tried to do some magic of his own, and ended up in a bubbly mess! Ultimately the young apprentice finds that passion and hard work, tempered with patience and discipline, can make the most magical dreams come true.

Babel

A Klingon version of Hamlet, attempts to teach chimps to speak, and mice that have been given the "language gene" are all part of Stephen Fry's exploration of the origins of language in this program. Why are human beings the only species with true linguistic ability?

#BBC032-NR15 \$189.95

Identity

What makes one group of humans different from another? In this program, Stephen Fry argues that above all, it is the way they speak—be it a national language, regional dialect, or even class variation. Visiting markets in Kenya and call centres in Newcastle, Fry charts the shifting patterns of lingua franca and the inexorable spread of Globish (global English).

#BBC033-NR15 \$189.95

Uses and Abuses

While not everyone approves of "bad" words, in this program Stephen Fry learns that profanity plays an important role in human communication. Fry undergoes an MRI scan to find the part of the brain associated with swearing, and meets a stroke patient and a person with Tourette syndrome, both of whom say they can't help using the F-word.

#BBC034-NR15 \$189.95

Spreading the Word

In this program, Stephen Fry delves into the history of the written word, starting with the earliest writing—cuneiform—and ending with blogging and twittering. Along the way he looks at how printing shaped our relationship with writing, eventually resulting in libraries, encyclopedias, and computer code.

#BBC035-NR15 \$189.95

The Power and the Glory

Storytelling has been with us as long as language itself. The desire to both entertain and explain has resulted in the flowering of language to describe every aspect of the human condition. In this program, Stephen Fry discovers what makes a good story, and why some writers are better at conveying joy or horror than others.

Clara's Big Ride: W5

Grades 7-Post Sec 15 min 2014 CC CTV

When Clara Hughes says that she has suffered from depression, the first reaction of many would linger somewhere between astonishment and disbelief. After all, this is a woman who seems to have it all, whose best known physical feature is a billboard big smile. She is among the greatest athletes the country has ever produced, and the only athlete anywhere to win multiple Olympic medals in both winter and summer games. At first glance, hers is a life of fantasy and accomplishment. But as Hughes knows well, depression can be debilitating and

insidious.

There may be little an ex-athlete can do to cure the depression of millions of Canadians. But there may be much she can do to drag it into the open. That now has become the focus of the same intensity and commitment that drove her to the top of the athletic world. This year, Clara Hughes will begin what she describes as the most important project of her life. It may be the most grueling as well. She will ride her bike across Canada, encouraging people to talk about mental health.

Reasons to Live, Reasons for Hope: Preventing Teen Suicide

Grades 7-Post Sec 2014 20 min CC Human Relations Media

This video emphasizes the hopeful message that suicides can be prevented. It focuses on the preventative actions that students can take if they are having thoughts of suicide or know of others who are at risk. It features the stories of young people who found help after making an attempt or having suicidal ideation. Evidence and research-based, the program helps students:

- Understand protective factors that decrease the risk of suicide.
- Recognize the importance of seeking help and identifying trusted adults who can provide that help.
- Identify the factors that increase the risk of suicide.
- Know the warning signs that a friend or classmate may be thinking of suicide.
- Realize the importance of not “keeping a secret” when a friend or classmate is at risk.
- Appreciate that there are effective treatments for depression and other mental health problems.

Bonus Feature: A second video on the DVD is directed at parents and teachers. A leading suicide prevention expert will help them understand the extent of the problem of suicide by teens. The expert dispels common misconceptions, describes how to identify at-risk students, and emphasizes what parents and teachers can do to prevent suicides.

Bullying and Suicide: Think About It

Grades 7 – Post Sec 21 min 2014 CC Films Media Group

Bullying is not “just a rite of passage.” In actuality, says the National Crime Prevention Council, it’s a leading factor in suicide among kids 11 to 16 years of age. And although bullying is only one of a number of suicide - related risk factors impacting tweens and teens, the fact that the term “bullycide” has entered the lexicon is a telling sign of how closely linked bullying and suicide are perceived to be. Structured around two scenarios in which a boy and a girl commit suicide after repeatedly being bullied, this video offers valuable insights into bully and victim psychology, types of bullying, and anti-bullying behaviour through penetrating commentary by Erica Perlow, of the Chatham County North Carolina Bullying Prevention Task Force, and psychologist April Harris-Britt. In addition, alternate scenarios are included that illustrate how bystanders to bullying can help neutralize some of the cumulative psychological effects of bullying that could - and too frequently do - push students to take their own lives.

There’s No 3G in Heaven: Addressing Teen Suicide

Grades 9 – Post Sec 43 min 2012 CC Films Media Group

What happens when a community is rocked by a series of suicides, all of them young people? Should the families mourn in private lest the publicity encourage even more students to take their own lives? Or is it true that since the advent of social media nothing is private anyway? This important program tells the story of an Australian community that, after a string of teen suicides, held a public meeting to allow the victims’ loved ones to share their experiences and discuss ways to prevent such tragedies in the future. Footage from the meeting lends poignant insight into the shortcomings of mental health services in addressing adolescent depression; the point is made that breaking the silence about suicide—and harnessing the potential of social media as part of a prevention strategy—may be the best way to vanquish this enemy.

Predator's Playground: W5

Grades 7-Post Sec 35 min 2014 CC CTV

As Canadian children are “wired” an average of seven hours a day on laptops, tablets, and cell phones, there are an estimated 750,000 predators online worldwide right now, lurking, “liking” and learning the online activities of underaged users. Is it easy pickings for predators in the online world? W5 investigates how much children and teens are sharing through social media and speaks to the mother of a teen whose tragic suicide rattled Canada and says what happened to her daughter could happen to anyone.

Detective Randy Norton is part of an Ontario Provincial Police joint taskforce called “Project P” – the “P” stands for child pornography. At his office at Durham Regional Police we watched him work, logging onto chat rooms while posing as a teen. Within minutes he’s being invited to chat and share pictures with what are obviously older men. Norton stresses that parents must pay attention to where their children are going online and to keep lines of communication open, particularly as the number of online sites used by kids and predators keeps growing. “You know, there’s Tiny Chat, Text Plus, What’s App, Kick, Twitter, Keek, Tumbler, Omegle and other ones. These are the ones that the parents need to start looking to see if your kids are actually communicating on them.”

Seeking the origins of the Maple Leaf, finding the soul of our nation

The People's Choice: W5

Grades 7 – Post Sec 40 min 2014 CC CTV

Powerful, identifiable, and unifying: Canada's maple leaf flag is worn and flown by Canadians around the world, serving as a statement of pride and patriotism. From celebrations on Parliament Hill to conversations with historians, W5's Kevin Newman investigates the rich history of the maple leaf flag showing how the now iconic flag unified the country and saved a nation. The eventual choice was the maple leaf design that flies across Canada today – one that Canadians fly with

pride, wave when Canada's athletes win, and with which Canada's fallen warriors are draped. But just who created the single maple leaf design, when it was first created, and who on the parliamentary committee knew about it before the debates even began was never revealed... until now.

Abandoned by the British, occupied and plundered by the Americans, In the War of 1812, the People of Southwestern Ontario Will spend several years living in a Brutal War Zone

A DESERT BETWEEN US & THEM

RAIDERS, TRAITORS AND REFUGEES
IN THE WAR OF 1812

Grades 5-12 2013 3 programs x 50 min ea The Living History Multimedia Association

A Desert Between Us & Them: Raiders, Traitors & Refugees in the War of 1812 tells the little-known story of the devastating effect the War of 1812 had upon the Upper Canadian peninsula (now Southwestern Ontario), with a focus on what life was like for people on the ground. Residents were faced with numerous American raids, constant pressure to change one's allegiance, a shortage of food, thousands of refugees on the muddy roads, and the eventual abandonment of Southwestern Ontario by the British Army. Most civilians in Canada didn't experience the war directly, but for people in this area, the war came to their homes – sometimes repeatedly. Their homes were burned, their food and livestock stolen – they became refugees. Narrated by R.H. Thomson.

Part 1: The Refugees

After the loss of Lake Erie to the Americans, the British abandon Upper Canada's Western Frontier, and the Moravian Delaware flee to Burlington Heights with thousands of other refugees.

Part 2: The Traitors

The majority of settlers on Upper Canada's Western Frontier were born in the United States. While most residents try to avoid conflict, some will choose to aid the Americans and die for their disloyalty at the hands of the British.

Part 3: The Raiders

In the fall of 1814, Governor Cass and General McArthur plan a total militarized destruction of Upper Canada's Western Frontier. Peace comes as the refugee camps at Burlington Heights become increasingly desperate and the British government is flooded with War Claims.

Sir Isaac Brock

Major General Sir Isaac Brock is considered one of the greatest heroes of the War of 1812, even though he was dead before the war was six months old. How did one man have such an impact? This is the story of a brash leader whose fearlessness may have cost him his life.

#BAM001-NR15 \$99

Charles de Salaberry

The Americans were marching to take Lower Canada and strangle supply lines to the east. The Canadians were outnumbered and had few British regulars. Find out how the efforts of the Canadian militia, First Nations warriors, and the shrewd Charles de Salaberry gave the Americans an unwelcome surprise.

#BAM002-NR15 \$99

Laura Secord

Her husband was shot and her house was filled with enemy soldiers when she heard the plans of an American attack. There was no one to get word to British officers. This story details how Laura Secord walked more than 30 kilometres through the forest to reach British leaders, in hope of preventing a slaughter.

#BAM003-NR15 \$99

Tecumseh

The Americans were expanding west, further encroaching on First Nations land. Tecumseh knew the best chance for his people would be to band together and join the British in the War of 1812. See how this Shawnee warrior's stunning victories and shattering defeats altered the future of North America forever.

#BAM004-NR15 \$99

John Norton

When Sir Isaac Brock fell at the Battle of Queenston Heights, Six Nations warriors led by John Norton helped chase the Americans away. Find out why the half-Scottish, half-Cherokee Norton was a constant and controversial figure throughout the entire War of 1812.

#BAM005-NR15 \$99

Enos Collins

The Atlantic Ocean was a major theatre of War in 1812. See how Enos Collins and his ship, the Liverpool Packet, seized American ships, which not only helped the Canadian effort, but also made him one of the richest men in North America.

Kill the Senate: W5

Grades 9 – Post Sec 34 min

2013 CTV

For months, headlines about the Senate have been dominated by alleged spending irregularities of four senators: Conservative appointees Mike Duffy, Pamela Wallin, Patrick Brazeau and recently retired Liberal Mac Harb. Their actions threw the spotlight on the Senate as an institution. When we began to do research for W5's report on the Senate, one of the questions we asked ourselves was: "What do senators do?" Ireland has been questioning the need for its upper house for years, and now, voters are preparing to decide whether to abolish it.

ON-CORE

The Story of One of Ontario's Most Iconic Landscapes

Grades 5-12 2012 3 programs x 52 min ea The Living History Multimedia Association

Narrated by R.H. Thomson, the series uses aerial and time-lapse videography, cinematic historical re-enactments, animation, an original musical score, and hundreds of rare historical photographs and films to introduce you to *The Land Between*, and the ever-changing story of how humans have interacted with this special region throughout time.

Known as an "ecotone," *The Land Between* is a liminal space between the Canadian Shield and the St. Lawrence Lowlands. It is home to a host of overlapping species from the north and the south, which has encouraged sharing between First Nations cultures for thousands of years. But European settlers couldn't figure out what to do with its incredibly diverse patchwork of rock barrens, rivers, lakes and marshlands. It was not until the Victorian fascination with "wilderness" that *The Land Between* found a place in the collective psyche of Canadians – when people gave parts of it names like "Muskoka" and "The Kawarthas." And it's only recently that recreational use and urban resource needs have placed this biologically diverse region under threat.

SPECIAL SERIES PRICE: ONLY \$585

Series Product #LIV005-NR15

Individual programs: \$195 ea

Streaming Price (3 year term): Single School – K-12: \$295 each

The Best of Both Worlds: Part 1

The first episode of this series starts with an introduction to *The Land Between* concept - beginning with how its transitional geology and ecology has been understood for centuries. Recently, the late Peter Alley passionately promoted a broader understanding of this ecotone - a very unique landscape. *The Land Between* has four great gathering places in the histories of First Nations peoples: Mazinaw (Bon Echo), Kinomagewapkong (Peterborough Petroglyphs), Mnjikaning (Orillia) and Beausoleil Island; they had unique connections with this region. The symbiotic relationship that developed here between the agricultural Wendat of the south and the hunter-gatherer Anishinabe of the North is also explored. Finally, we look at Europeans' first impressions of *The Land Between*, the chaos that the Beaver Wars brought to the region, and the resulting peace treaties, which re-established sharing of the land's resources.

#LIV006-NR15 \$195

Country of Our Defeat: Part 2

The Co Sam Moore, in the early 1800s, started a trading post in partnership with a Mississauga man he called "Too Tall". Surveyors, who were amongst the next Europeans to come to The Land Between, had great difficulty in understanding and finding a use for a land they described as a "barren, rocky country." The timber industry and lumber barrens followed, and had a huge impact upon the landscape. In order to encourage more diverse settlers to come to *The Land Between*, the government developed a network of colonization roads, which they hoped would help to populate the region. In reality, many of these roads turned into trails of broken dreams for the farmers who settled here. Finally, the program presents the region's mining history, including Ontario's first gold rush, and the multitude of mostly unsuccessful mining ventures lured into *The Land Between* by its incredibly diverse geology.

#LIV007-NR15 \$195

Ginowaydaganuc: Part 3

This episode explores some modern-day relationships with *The Land Between* landscape, including an artist, an archaeologist, an elder, a cottager, a canoeist, and a Buddhist monk. We then go back in time to discover how some of these modern day relationships and feelings developed, from the first Victorian travellers and artists, to early tourism and First Nations guiding, to children's camps, and the implementation of the parks system. Some individuals have recently taken responsibility for becoming stewards of their favourite piece of *The Land Between*. Today, volunteer groups, governments, and corporations are struggling to find a balance between economic development and environmental sustainability for *The Land Between* of tomorrow.

The Shield Series

Grades 5-12 2010 4 programs x 120-140 min ea

The Living History Multimedia Association

This wonderful series weaves together the history and geology of Ontario's north. Shaped by the Precambrian Shield, each area has a distinct story to tell. This is the story of the Anishinabek/Haudenosaunee, who plied the many rivers and lakes for thousands of years - until they were banished following the Treaty of 1850. It's the story of the European farmers, enticed to travel thousands of miles by a government's offer of free 'farm' land - who arrived to find thin acidic soil and an inhospitable climate. It's the story of English and French explorers who arrived to claim its riches. It's the story of the first tourists, who dared to venture into the sparsely settled wilderness. But above all, this is the story of those seeking opportunity just beyond the familiar, on the edge of the unknown North.

Featuring beautiful fall colours, the topics covered include acid rain and Canada's collective of landscape painters, the Group of Seven.

#BAM008-NR15 \$89

Sleeping Giant Provincial Park

Find out just how important this park is to the residents of Thunder Bay, and take a look at the annual ski festival, the Sleeping Giant Loppet.

#BAM021-NR15 \$89

Quetico Provincial Park

Find out how Quetico earned its reputation as the Canoeing Capital of Canada. Also discussed is the declining moose population.

#BAM022-NR15 \$89

Algonquin Provincial Park

Algonquin is a major research hub for those wanting to learn more about the wild population that reside there, such as grey jays and bears.

#BAM023-NR15 \$89

Located 70 kilometres north of Vancouver, Garibaldi is home to many steep mountains and glaciers, as well as an interesting selection of wildlife, including the largest member of the weasel family, the wolverine. The park is one of the world's major areas for climate change research.

#BAM024-NR15 \$89

Liard Hot Springs Provincial Park

A popular stopover for people travelling the Alaskan Highway, this remote park in Northern BC is home to the second largest hot spring in Canada.

#BAM025-NR15 \$89

Pacific Rim Reserve National Park

Raging pacific storms pound 125 kilometers of rugged western shore into one of the world's premier coastal temperate rainforests. With all that rainfall comes unique vegetation. The park's formidable Sitka spruce can grow to 100 meters tall. Despite the richness of the environment, it is also home to 42 species-at-risk.

#BAM012-NR15 \$89

Torngat National Park

Torngat Mountains National Park folds treeless and rugged up the Labrador coast. Aboriginal people have lived, fished and hunted in this region for over 7000 years. But in the mid 20th century they were systematically moved off the land. This park was in part created to return the aboriginal people to their birthright. This park is also an ideal spot to get an advanced look at the effects of climate change on arctic regions.

#BAM014-NR15 \$89

Point Pelee National Park

This birder's paradise is a theatre of life and death. There are more species at risk here than in any other park in Canada. In fact, the park itself is in danger from coastal erosion, and massive use of pesticides in the past. For the park and the animals that stop here, every day is a fight for survival.

#BAM009-NR15 \$89

Banff National Park

Banff National Park is the first and perhaps still the finest of all Canada's National Parks. Within its boundaries, Banff National Park contains a sampling of Canada's greatest natural assets—from tiny snails, to grizzly bear tracks; from back country skiing to ice climbing. But hosting almost 4 million visitors a year means Banff must balance the infinite complexities of a vast ecosystem with the heavy footprint of the modern world.

#BAM010-NR15 \$89

Bruce Peninsula and Fathom Five National Park

Located in prime Great Lakes territory, two protected areas sit side by side, brimming with life, spectacular scenery, and cultural treasures. Bruce Peninsula National Park and Fathom Five National Marine Park are the last refuge in Southern Ontario for many rare species. Thousand-year-old cedars, rare orchids and the Eastern Massasauga Rattlesnake all live with and within the landscape's rocky cracks and crevices. But, life underwater is out of control. Invasive species are taking over. And preserving diversity on this ancient geological backbone is a constant struggle that requires a delicate balance.

#BAM011-NR15 \$89

Cape Breton National Park

Home to some of the highest densities of moose ever recorded anywhere in the world, it's virtually impossible to travel here without seeing some kind of wildlife. But, for Cape Breton it is the explosion of populations that remains a threat. Park ecologists scramble to deal with the aftermath of the budworm and moose infestations, while threats of multiplying populations loom underwater.

#BAM013-NR15 \$89

Fundy National Park

Sitting on the Bay of Fundy coast, the park is heavily influenced by the bay's tides—the highest tides in the world! But the fish in these waters are in serious trouble, especially the area's unique salmon species. Logging took a heavy toll on the water system here. In only fifteen years, the number of returning adult salmon dropped from forty-five thousand to a mere two hundred.

#BAM016-NR15 \$89

Terra Nova National Park

Terra Nova's rugged boreal forest was protected from fire for decades, a decision that is in fact destroying many of the most prominent trees.

#BAM017-NR15 \$89

Grasslands National Park

Grasslands National Park sits on Canada's border between Saskatchewan and Montana. Two separate blocks, one east and one west, protect the North American mixed grass prairie—one of the most threatened ecosystems in North America.

#BAM026-NR15 \$89

Riding Mountain

There are no easy answers when you have to protect nature and people at the same time. This park is home to an ecological balancing act.

#BAM015-NR15 \$89

Quittinirpaaq National Park

Quittinirpaaq National Park is quite literally on top of the world. However, even in this pristine surrounding you can find the ugly footprint of humans. Bases for arctic exploration are littered with garbage, some of it toxic. The effects of climate change are felt in the melting polar cap and the 20 degree heat.

#BAM018-NR15 \$89

La Mauricie

The 150 lakes here are clogged with the effects of a hundred years of logging. The desire to preserve what hasn't been cut has also damaged the forest. Now prescribed burns and lake cleanups are attempting to erase the sins of the past.

#BAM019-NR15 \$89

Gulf Islands

Gulf Islands National Park is a fragmented structure, stitched together from a series of islands sandwiched between the urban development of Vancouver Island and mainland British Columbia. The park was established in 2003 in order to protect this diverse landscape from recreational development that threatened to overrun this natural wonder. The latest high tech equipment is being used to help rare ecosystems fight back against years of misuse.

#BAM020-NR15 \$89

Green Planet Series

DocJam Series ON-CORE

Grades 9-Post Sec 2011-2012 CC 25 min ea Canazwest

Spectacularly shot in and around the remote communities of Terrace and Dawson Creek, DocJam explores the lifestyle, environment and points of view of the people who live there, providing local reflection on the diverse culture, traditions and changing times in these northern regions. An excellent resource that gives a Canadian take on various social, historical and political issues - the construction of wind farms, the survival of agriculture, First Nations issues, the construction of the railway and more.

SPECIAL SERIES PRICE: ONLY \$1190

Series Product #CPI000-NR15

Individual programs: \$89 each

Streaming Price (3 year term): Single School – K-12: \$135 each

Dawson Creek

Dawson Creek, in the words of its inhabitants, is a place of constant change. Located in eastern British Columbia, Dawson Creek is a remote and resource-rich city in the heart of what is known as Peace River Country. A pioneer-oriented culture can be felt throughout the city, as it is an area which has been populated by Aboriginal peoples for over 10,000 years. With an economy fuelled by industries such as farming & agriculture, as well as oil and natural gas mining, it is a prosperous area which provides employment for many.

#CPI001-NR15 \$89

Terrace

In Terrace, British Columbia, a rich history exists that goes back to when Aboriginal peoples lived on the land. In this episode, we'll learn about the city's Aboriginal roots, but also how a settler named George Little put the area on the map in the early 1910's. We'll also see how the railway has a huge importance to the city, as it not only facilitates transport in the area, but links the entire country together.

#CPI002-NR15 \$89

The Dawson Fair

In the 1920's, the Canadian government was giving away plots of land to encourage people to move north to areas like Dawson Creek. As people did just that, the newcomers decided that they wanted a formal way to celebrate Canada Day and being a Canadian. Therefore, in 1922 the people of Dawson Creek put on a rodeo that included a racetrack, trails and food booths. This ended up being the first edition of the Dawson Creek Exhibition and Stampede, which still runs today. This episode gives a behind-the-scenes look at the wonderful group of people who currently keep the Stampede alive and well.

#CPI003-NR15 \$89

A Winter Tale

Winter life in British Columbia can be exhilarating, as it has much to offer both local residents and travellers from afar. Part of that includes Northern Escape Heli-Skiing, a skiing business near Terrace, British Columbia. Picturesque back country, which includes the unrivalled Shames Mountain, provides access to many avid skiers and snowboarders to gather and take part in the winter lifestyle. And while the mountains and hills provide thrill seekers with the landscape, it's the people behind businesses like Northern Escape that make it possible for everyone to get the most out of the experience.

#CPI004-NR15 \$89

Donald A. Petit

Donald A. Petit is a photographer who works in Dawson Creek. He is incredibly knowledgeable with regards to the history of the land and the people who have inhabited it over the years. Originally from southern Ontario, Donald opened up a photography studio in Dawson Creek in 1974, and he has been connecting with the landscape of the area ever since. He has taken it upon himself to make the people of Dawson Creek and British Columbia understand how beautiful an area they live in through his photography.

#CPI005-NR15 \$89

Carver of Stories

"Art has to come from a history and foundation, and ours is our stories..." Those are the words of Dempsey Bob, a world renowned carver from British Columbia. In this episode, he shares his tales of how he began carving and why he is passionate about what he does. We see a number of pieces which are part of his vast collection of carvings, as well as how he shares his gifts with others through teaching his art form.

#CPI006-NR15 \$89

A Wind of Change

With an abundance of oil, gas, coal, forestry and agriculture, the Dawson Creek area has long been a resource-rich land. Oil and gas will inevitably run out in the coming decades. In this episode, Donal A. Petit Petit describes how the future of the area's resource production lies in wind power. A source of energy that is renewable and does not pollute the environment, wind power could very well be the future of energy production.

#CPI007-NR15 \$89

The Railroaders Daughter

The rich history of Terrace, British Columbia has long been linked to the railway and the many people who worked on it over the years. One of those was Richard Rinaldi, who worked for Canadian National Railways for 35 years, from 1952 to 1987. His daughter, Chantal Meijer, grew up in railroad stations all across British Columbia. In this episode, she shares the story of the railway's history in British Columbia, as well as her memories of growing up on the railway.

#CPI008-NR15 \$89

Days of Summer

Terrace, British Columbia and its surrounding region is often referred to as the playground of the Northwest. Skeena Valley Expeditions, which began operations in 2007, is one of the many companies which allow people to experience what the Terrace region has to offer, as they are the area's first commercial rafting company. As well, along the Skeena River sits Yellow Cedar Lodge, a world class fishing lodge which is surrounded by a picturesque environment. Clearly, from fishing and rafting, to such activities as mountain biking and motocross, Terrace's great outdoors has plenty to offer.

#CPI009-NR15 \$89

A Duck's Eye View

Riverboat Days has been an annual summer festival celebrated in Terrace, British Columbia for over thirty years. It is an opportunity for the community to not only come together, but to show off everything that is great about the city. One of the biggest, most notable events is the Rotary Club's Duck Race. It involves over 5,000 ducks being dropped into the Skeena River, for a duck race that everyone loves to watch. While we will see that there are many other events which take place during Riverboat Days, the Duck Race truly the crown jewel of Riverboat Days.

#CPI010-NR15 \$89

Little Town, Big Totem Poles

In 1911, the town of Terrace, British Columbia was founded by George Little. Yvonne Moen is a historian who has lived in Terrace since 1959. She has written, co-authored and published a number of books about the history of Terrace. In this episode, we get a look at her story, but we also learn about what makes up the town's cultural identity. A major factor of that includes the unique First Nations art form of crafting totem poles, which provide the region an individuality and uniqueness unlike any other.

#CPI011-NR15 \$89

Harvest of Life

Amid the oil and gas boom in Dawson Creek, farmers struggle to survive by maintaining agricultural methods old and new. In this episode, we follow Tim and Linda Ewert, who have been organically farming since 1974. They grow market garden organic food for local consumption. The culture clash between old and new farming methods is featured, which is a growing issue in British Columbia.

#CPI012-NR15 \$89

Out of Site

During the 1970's, the Site C Dam mega-project was planned by BC Hydro. It is a project that would involve submerging around 4,500 hectares of Class 1 farmland, including First Nations' territory and various wildlife habitats. This issue has led to a massive debate among the community about the dam, whether it is worth building, and its impending environmental impact on the surrounding ecosystem. We hear from many people in the community speak out about where they stand on the idea of the dam being built in the Peace River area.

#CPI013-NR15 \$89

The Road to Peace

West Moberly First Nations are a reserve which has much respect for the environment and preserving it. However, many projects are being developed which are threatening the environment's well-being. On this topic, we hear from Chief Roland Willson of the West Moberly First Nations and Dawson Creek resident, who gives his take on the situation. We also hear from politician and MLA for Peace River South the Honourable Blair Lekstrom, who discusses the benefits of developing the Peace River area.

Sydney tar ponds have been cleaned up but ghosts of toxic past remain

Hell to Heaven: W5

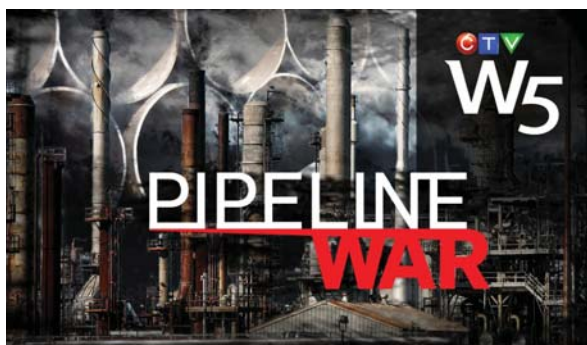

Grades 6-12 2014 20 min CTV

W5's Todd Battis investigates how what was once considered the most toxic spot in North America was buried under an urban oasis.

The eighty-acre greenbelt, called Open Hearth Park, in Sydney, N.S. features walking trails, a soccer pitch, and a children's playground. One would be forgiven to forget that only a few short years ago it was the site of the most toxic place in Canada. A slough filled with deadly,

Teaching Moment: An excellent program that shows the effects industry in Canada can have on both the environment and people living around it. Can be used in science, social studies, and geography classes.

Enbridge's Line 9 pipeline has been carrying oil in Canada between Montreal and Sarnia for 38 years, running near communities such as Cornwall, Kingston, Mississauga and Toronto.

Total amount leaked from Line 9 in Canada:
3,065,359 L

Pipeline War: W5

Grades 6-Post-Sec 2014 20 min CTV

W5 investigates the pipeline war being waged over the future of Enbridge's Line 9 oil pipe, which runs from Montreal, through Toronto and to Sarnia, Ont. A pipeline rupture can leave devastating effects for landowners. Families affected by Enbridge's Line 9 pipeline share their stories. One farm owner shares her story of how she has been warned to not drink her own water or grow food on her farm.

CTV619-NR15 \$99.95

Streaming Price (3 year term): Single School – K-12: \$135

Teaching Moment: 3,065,359 litres of oil have leaked from Line 9. This enlightening program can be used to show issues related to the use of Canada's natural resources. Can also be used to show the correlation between health problems and exposure to oil contamination.

Chinese economic growth at a cost:

Pollution poisons lakes, rivers and skies

Made in China: W5

Grades 9 – Post Sec 2014 20 min CTV

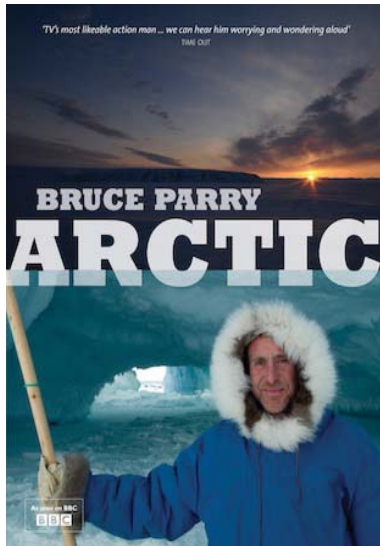

There was a time, as China began opening to the world in the early 1980s, when the sign of success was for a family to have a bicycle and electric light. The streets of Beijing, the country's capital, teemed with cyclists. Few cars filled the wide avenues. Hazy days meant winter winds had blown desert sands into the skies over the capital. Today, those same streets are jammed with the new sign of China's upwardly mobile middle class: automobiles. Beijing has 20 million residents, five million cars, and a huge pollution problem. And the thick soup that obscures the sun is man-made. Janis Mackey Frayer looks at the thick blanket of smog created by China's rapidly-expanding industrial economy, and its impact on the land.

Teaching Moment: An excellent program that shows the effects industry on the surrounding land and its people. Can be used in science, social studies, geography and business classes.

Arctic Series, with Bruce Parry

Grades 9-Post Sec 2011 50 min ea CC BBC

The Arctic is on the point of enormous, irreversible change. The effects of global warming are magnified in this area, as the sea ice is melting, new land is appearing and with it, fresh boundaries are being drawn. Indigenous ways of life that have remained virtually unchanged for millennia will cease within our lifetimes - but for others, the untold riches of the oil, gas and minerals slowly being revealed under the polar ice cap promise countless opportunities. Over the course of one summer, Bruce Parry immersed himself in the lives of the Arctic's people. From the fishermen in the Bering Sea, to oil workers tapping the vast wealth of the Arctic reserve, native hunters desperately clinging on to the last breath of their culture, bush pilots, miners, fire-fighters and scientists mapping the ever-shrinking ice cap.

SPECIAL SERIES PRICE: ONLY \$899.75

Streaming Price (3 year term): Single School – K-12: \$285 each

Canada

Bruce travels to the far north of Canada to live with the Caribou people and witness their annual spring hunt. The Gwitchin tribe has hunted migrating caribou in the Arctic wilderness for thousands of years, but this tradition is now under threat from oil exploration. Bruce then heads south to the tar sands of Alberta, home to the second largest oil reserves in the world, to discover how native people cope when the oil industry moves into their territory.

#BBC041-NR15 \$189.95

Siberia

Bruce Parry journeys to meet the Sakha horse people and a remote encampment of Eveny reindeer herders in the wild Verkhoyansk Mountains, where he finds out how they are embracing the challenges of a post-Soviet Arctic. For Bruce, it's also a journey of personal discovery as he goes in search of the ancient shamanic religion of these wild northern lands.

#BBC038-NR15 \$189.95

Northern Europe

Bruce heads to a remote Russian village, deep within the vast boreal forest. Life here has changed little for hundreds of years, and people still depend on the food they gather from the woods. Bruce then travels north into Norway where he lives with the Saami, reindeer herders who use snow machines, boats and even helicopters to move their animals. His last stop is a remote scientific community in Svalbard where he learns about the fragility of the Arctic ecosystem.

#BBC039-NR15 \$189.95

Greenland

Bruce Parry journeys to the far north of Greenland, home to the last traditional Inuit hunters. He experiences the realities of life—and death—on a seal hunt, and learns how climate change is threatening their ancient way of life. But while global warming is causing problems for the hunters, it is providing others with new opportunities. As the vast Greenland ice sheet melts, new mineral riches are being revealed.

#BBC040-NR15 \$189.95

Alaska

Bruce travels to Alaska, America's last great wilderness, where modern-day pioneers are harvesting the vast natural wealth of the seas. Bruce learns the ropes on-board a salmon-fishing boat, and dives to the bottom of the Bering Sea to look for gold. In the far north Bruce witnesses the annual whale hunt of the Inupiak people whose ancient tradition is now at odds with the modern world and questions what is more important: the life of a whale or the death of a culture?

Series Product #PE0100-NR15

Streaming Price (3 year term): Single School – K-12: \$149 each

The Maid of the Mist

One of the world's most amazing natural wonders is also a very spiritual Aboriginal meeting place. Chuck and Andy learn about the power of water as they go on an awesome adventure in search of the Maid of the Mist at Niagara Falls, Ontario. Also included: Calument Skater Tales; The Remarkables; and Michael's Creature Feature.

PE0101-NR15 \$99.95

Great Balls of Fire

"If the sun is so "hot" then why can't we just power everything on earth with its rays? ... After all it's free... and it's clean?" Chuck and Andy set out to discover the mystery and powers of the sun... from its spiritual life giving force to the deadly radiation it creates. Along the way we find out how people are trying to harness the power of the sun... so grab some shades! Also included: Calument Skater Tales; The Remarkables; and Michael's Creature Feature.

#PE0102-NR15 \$99.95

Night Crawlers

Just because some creatures only come out at night doesn't mean they are bad. Chuck and Andy learn that there are all kinds of things going on in the world when it gets dark... right under our noses! And while some of them may seem scary... there are a lot of really cool things happening too! Also included: Calument Skater Tales; The Remarkables; and Michael's Creature Feature.

PE0103-NR15 \$99.95

Home Sweet Home

What makes a home green? When Chuck tells Andy that their ancestors could build environmentally friendly homes made out of grass sod, the boys go in search of some new ideas, high tech gadgetry and low tech common sense on how we can all make our homes "greener". Also included: Calument Skater Tales; The Remarkables; and Michael's Creature Feature.

PE0104-NR15 \$99.95

Deserts

Chuck and Andy head to the Mojave Desert to find out how people and animals can survive in such an extreme climate. They learn that the desert is a "living thing" that needs our help too! Also included: Calument Skater Tales; The Remarkables; and Michael's Creature Feature.

PE0105-NR15 \$99.95

From Point A to Point B

When Chuck and Andy need to make an urgent, super-rush delivery across the city they find out it's not so easy to make eco-friendly choices getting from Point A to Point B. So what is the most earth friendly way to get from Point A to Point B? Well that depends on what you are doing, how far you are going and what you have to carry. Also included: Calument Skater Tales; The Remarkables; and Michael's Creature Feature.

PE0106-NR15 \$99.95

Weather

The weather affects all of us. When Chuck decides that he is destined to become the "world's greatest Weatherman!", Andy has a few fun tricks up his sleeve to throw Chuck off his game. We learn all about storm chasing and other meteorological stuff. Also included: Calument Skater Tales; The Remarkables; and Michael's Creature Feature.

PE0107-NR15 \$99.95

Flying High

Can flying actually be environmentally friendly? The boys go behind the scenes at one of Canada's biggest airlines to find out how new technology is making flying the skies a little more eco-friendly. Also included: Calument Skater Tales; The Remarkables; and Michael's Creature Feature.

PE0108-NR15 \$99.95

Going Deep

Chuck and Andy try to figure out "just how deep you can go?" when they head out on adventure to the Grand Canyon. The guardians of the canyon, the Hualapai Nation of Arizona, have a special message for Chuck and Andy. Also included: Calument Skater Tales; The Remarkables; and Michael's Creature Feature.

PE0109-NR15 \$99.95

The Ballad of Chuck and Andy

Chuck and Andy head out on a musical journey to the HARVEST MOON FESTIVAL in Manitoba, Canada. Who knew music could be green! Also included: Calument Skater Tales; The Remarkables; and Michael's Creature Feature.

PE0110-NR15 \$99.95

Stuff

Do we have too much stuff? In the past you only owned as much as you could carry. Chuck and Andy take advantage of Winnipeg's "Free Giveaway Weekend" to build the ultimate outdoor "living room". Along the way they find out about the difference between stuff we really need and stuff we think we need. Also included: Calument Skater Tales; The Remarkables; and Michael's Creature Feature.

PE0111-NR15 \$99.95

Life's A Beach

After landing on a deserted stretch of sand, our shipwrecked explorers Andy and Chuck learn all about beaches... how they are formed, who lives on them and how to best protect them. Also included: Calument Skater Tales; The Remarkables; and Michael's Creature Feature.

PE0112-NR15 \$99.95

Life on a Limb

Have you ever wondered about the secret lives of trees? Chuck and Andy set out to build a tree house and get "one with nature". Also included: Calument Skater Tales; The Remarkables; and Michael's Creature Feature.

Series Product #PE0200-NR15

Streaming Price (3 year term): Single School – K-12: \$149 each

Dr. G's Frozen Feet

In this episode we learn how to be "green" even in the winter! ADVENTURE: Chuck and Andy decide to go snow boarding... in Hawaii! Silly guys... they decide that cleaning up the beach makes sense ...even if one of them is not dressed for it. THE LAB: Dr. G is upset because C & A are on a beach while here at home "baby it's cold outside". He also notices that GP has "no-energy" during the long winter months and discovers that when it's cold... there is not much energy available.

PE0201-NR15 \$99.95

Dr. G Gets a New Car

In this episode we find out how to make cars more earth-friendly.

ADVENTURE: Chuck and Andy go Go-Carting. Andy becomes frustrated when Chuck spends an entire race trying to make their cart "greener".

THE LAB: Dr. G decides to get rid of the gas guzzling MADMOBILE and create a super duper, greeny machiny. We find out how a gasoline engine works, what "horsepower means", how batteries store electricity and how car tires can be recycled.

PE0202-NR15 \$99.95

GP Takes a Bath

In this episode we find out how to stay green while getting clean.

ADVENTURE: The guys decide to hold a PLANET ECHO Charity car wash to raise money for the environment. Their plans are dashed when their first customer is a very dirty school bus. The boys spend the whole day washing one vehicle by hand!

THE LAB: Dr. G decides that GP is a bit stinky and needs a bath. Since Guinea Pigs don't like to get wet Dr. G makes a special soap that is environmentally friendly and we learn all about different ways to keep the planet clean.

PE0203-NR15 \$99.95

GP Smells Garbage

In this episode we find out what really happens when we "recycle."

ADVENTURE: Chuck and Andy write a script... and make fun of our industry by writing too many scripts and signing too many legal and accounting documents. By the end of the day they are up to their eyeballs in paper!

THE LAB: Dr. Greenie's lab is creating a lot of garbage lately and since GP is the one who has to take the "smelly garbage" out every day, he wants to know why they're not trying to reduce, reuse and recycle. When Dr. G suggests a plan to convert garbage into Guinea Pig food... GP is not so sure.

PE0204-NR15 \$99.95

Teaching Moment: This award-winning Canadian series is a fun, fast-paced show aimed at exploring global ecological issues and the importance of being responsible stewards of the environment.

Waves

In this episode it's all about the power of the ocean.

ADVENTURE: Chuck and Andy decide to go for a sail. Chuck overpacks and brings every environmental gadget he can along with lots of other crazy stuff. While the guys prepare the boat, Andy lists off all the environmentally friendly things there are to know about sailing. When they finally get all loaded and cast off... the boat heads out to sea with both of the guys still on the dock...very Forest Gump!

LAB: Dr. Greenie explores everything there is to know about oceans and shows us stuff you never even dreamed of.
PE0205-NR15 \$99.95

GP's Bad Air Day

In this episode we learn how the earth "breathes" and why trees are so important.

ADVENTURE: Chuck and Andy go fly a kite. ... only to find that there is no wind. Along the way they discover how kites fly, and how air moves and why trees are not so great for kites.

THE LAB: It's the middle of the summer and GP finds that the air outside is really stinky. The air pollution is really starting to get to him... Dr. Greenie and GP explore ways to keep us all breathing cleaner air.

PE0206-NR15 \$99.95

Shrinking!

In this episode we learn that habitats are shrinking everywhere and that it's important that we all do our part to protect them.

ADVENTURE: Chuck and Andy check out the ultimate small habitat when they buy an ant farm. Fun and mayhem ensues when the ants get out in their Aunt's house!

The LAB: Dr. G's lab experiment goes wrong and he ends shrinking himself to table-top size. But really big things, both good and bad come in small packages... Dr. G investigates.

PE0207-NR15 \$99.95

Footprints

In this episode we find out what a Carbon Footprint is and how we can reduce it.

ADVENTURE: When Chuck and Andy go for a walk in the woods they come upon a giant footprint in the mud they are convinced they have found proof that the sacred SAGE really exists. The boys go in search of the SAGE with all kinds of crazy spirit hunting gadgets.

THE LAB: Doc Greenie is trying to reduce his and GP's carbon footprints in the lab but GP has no idea what a carbon footprint is.

PE0208-NR15 \$99.95

Three Little GPs

In this episode it's all about building and making our homes greener.

ADVENTURE: The guys decide to pitch in and help build a house with Habitat for Humanity. Hilarity ensues when Chuck and Andy end up being more like Laurel and Hardy than Mike Holmes!

THE LAB: When GP threatens to run away Dr. Greenie offers to build him a brand new house made of 100% recycled and organic materials. DR. G build three houses out of weird stuff but GP rejects them all.

PE0209-NR15 \$99.95

Ultimate Guinea Pig Power

In this episode it's all about alternative forms of power. From solar to wind we learn that there is a green alternative for just about every application.

ADVENTURE: Chuck and Andy try to plant a field of vegetables using people power because it's the environmentally friendly thing to do... turns out not to be such a good idea...

THE LAB: Dr G starts experimenting with a new energy source that he decides is going to revolutionize the world. It's called ULTIMATE GUINEA PIG POWER or UGPP for short. Dr. G hooks up just about every crazy power generation device known to GP to create the Ultimate green power-generating machine!

PE0210-NR15 \$99.95

Alien Attack

In this episode we find out that there really are aliens living amongst us. Some are good...some are bad.

ADVENTURE: Chuck tries to convince Andy that aliens really exist. Andy is not buying it until...

THE LAB: Dr. Greenie reveals his plan to build a space ship and launch GP into space. GP gets upset when he finds out that Guinea Pigs are actually aliens to North America. We find out about real aliens and the impact they have on the planet.

PEO011-NR15 \$99.95

Plastics

In this episode we find out that there are many alternatives to plastic... this could be big!

ADVENTURE: Chuck and Andy attend the "earth day" great garbage clean up and things don't go so well for them.

The LAB: Dr. Greenie is mad about plastics. They are a modern miracle but an environmental nightmare. GP doesn't see what the big deal is and lists off all the great stuff made out of plastic. Doc G sets out to reinvent a brand new eco-friendly plastic.

PE0212-NR15 \$99.95

Eco-Creatures I

In this adventure we find out how animals are helping us to help the environment.

ADVENTURE: Chuck and Andy go in search of the endangered NENE goose on the big island of Hawaii (the Nene is actually just a Canada Goose).

THE LAB: Dr. Greenie plans to create an army of giant pink Guinea Pigs to help clean up the planet. GP is not so sure.

PE0213-NR15 \$99.95

The Big Recycle

In this episode we learn the world of recycling!

ADVENTURE: Chuck and Andy help Rocky Road remove an old road, re-process the material and re-pave the road using the recycled concrete that even includes toilets.

THE LAB: GP and Dr. Greenie decide to become the Superheroes of composting but GP is more interested in what comes out the end of the machine than what goes in, including himself!

PE0301-NR15 \$99.95

Bees Knees

Find out how important Bees are to the environment.

ADVENTURE: When Chuck and Andy run out of honey, they head out to Wildwood Apiary to make some more not realizing how much hard work it is!

THE LAB: Dr. G. decides to turn the lab into his own honey-making machine. Little does GP know that he's about to become the Doc's worker bee. With GP power and some cool gadgets Dr. G. goes into the honey making business...barely.

PE0302-NR15 \$99.95

Rivers

In this episode we find out how river lock systems work.

ADVENTURE: Chuck and Andy head head off to the Trent-Severn Waterway. We find out how locks work, why they are eco-friendly and explore all there is to know about the Trent Severn.

THE LAB: When Dr. G. decides he needs a river cruise vacation, he sets out to build an eco-friendly river. GP's decides it's a great opportunity to return Fish Stick to her native habitat.

PE0303-NR15 \$99.95

A Day at the Dump

In this episode, we find out where our garbage goes.

ADVENTURE: Chuck and Andy follow the adventure of trash from the home to the landfill. Illustrated Andy arranges for a "special pick-up" for Chuck....

THE LAB: GP's cage is a stinking more than usual. Dr. G. creates a machine to dump GP's dumperty in a cleaner, safer, less stinkoraneous manner!

PE0304-NR15 \$99.95

Windy

In this episode it's all about the wind and how it works!

ADVENTURE: Chuck and Andy go faster and higher in a hot air balloon as they head into near space!

THE LAB: Dr. Greenie invents a new flying machine and of course GP is the official Guinea Pig tester.

PE0305-NR15 \$99.95

Fire and Ice

In this episode we learn about global warming.

ADVENTURE: Chuck and Andy are curious about the definition of Global Warming so they decide to head off to two extremely different wilderness areas to see how these areas are affected by climate change. Along the way they get sent to the wrong place.

THE LAB: Dr. G and GP disagree with the temperature in the lab. Dr. G. has to invent a new machine to keep the lab a steady, even temperature, which he bases off of Planet Earth itself!

PE0306-NR15 \$99.95

Green Jobs

In this episode we learn about some cool "green jobs."

ADVENTURE: Chuck and Andy learn about the ultimate "green" jobs working for Parks Canada.

THE LAB: When GP wants to quit the being the lab Guinea Pig, Dr. G. tries to convince him that he has amazing, unique talents.

PE0307-NR15 \$99.95

Learning to Camp

In this episode we find out all about camping...the Green Way.

ADVENTURE: Chuck and Andy decide to learn how to camp in a National Park.

THE LAB: Dr. Greenie tries to convince GP to go camping with him, but GP has a "paid project" he has to finish.

PE0308-NR15 \$99.95

Eco-Folk

In this episode we check out the environmental initiatives of the Winnipeg Folk Festival.

ADVENTURE: Chuck and Andy head to the Winnipeg Folk Festival planning to get the band going again.

THE LAB: The science of sound! What is sound? Dr. Greenie's new invention mal-functions and Doc and GP's voices are exchanged!

PE0309-NR15 \$99.95

Fashionably Green

In this episode we learn about green clothing.

ADVENTURE: Chuck and Andy enter the world of Haute Couture and set out to see if you can be fashionable and green at the same time.

THE LAB: Dr. G. Shows GP his new eco-friendly fabric made out of bamboo.

PE0310-NR15 \$99.95

Green Sports

Learn all about green sports, rock climbing, longboarding, etc.

ADVENTURE: Chuck and Andy each think they have the best idea on how to get in shape. Let the games begin!

THE LAB: Dr. Greenie enters GP in the "Mad Scientists Go Green or Go Home Fitness Challenge."

PE0311-NR15 \$99.95

Food

In this episode we learn about eco-friendly eating.

ADVENTURE: Chuck and Andy face-off in a slow-food cooking challenge.

THE LAB: Dr. G. tells GP they are going to go on a green diet. He's going to overhaul all the food in the lab to make it greener

PE0312-NR15 \$99.95

Eco-Creatures II

We learn about species helping the planet and people helping species.

ADVENTURE: Chuck and Andy line up a gig as honorary zoo keepers.

THE LAB: GP finds a bookworm and wants to keep him as a pet. Dr. G. creates bookworm a wormy-squirmy-vermi-habitat-itat.

PE0313-NR15 \$99.95

Inside the Human Body Series

Grades 9-Post Sec 2011 48-59 min ea CC BBC

Using breathtaking animations based on real images and the latest scientific research, this four-part series takes viewers on a voyage through the workings of the inner human universe, from the first breath taken to eventual demise. Traveling within the body, tiny clusters of hairs loom as large as forests and hidden chambers of the heart rise up like a vast cathedral. To illustrate the surprising ways that bodies work, the series also tells the stories of remarkable people from around the world who have pushed theirs to the absolute limit.

SPECIAL SERIES PRICE – ONLY \$719.80

Individual titles: \$189.95

Series Product #BBC043-NR15

Streaming Price (3 year term): Single School – K-12: \$225 each

Creation

Following the progress of a couple who are expecting triplets, from the 4D ultrasound scan to the babies' dramatic entry into the world, this program describes the improbable sequence of biological events that result in the birth of a new human being. State-of-the-art graphics depict the journey of millions of sperm cells as they race to the egg, revealing how the best is selected to fertilize it after the others are destroyed by white blood cells; a body beginning to self-assemble; and the face of a developing embryo coming together.

#BBC044-NR15 \$189.95

First to Last

Starting with a water birth shot in slow motion and featuring a stunning graphics sequence that goes inside the chambers of the heart, this program focuses on the countless small miracles the human body performs minute by minute in order to stay alive. Viewers learn how an infant's first breath leads to a rewiring of its entire circulatory system—and meet a diver who can hold his breath for up to nine minutes, a man who can swim in glacial lakes so cold they would kill a normal person, and a woman who has lived on a diet of crackers for ten years. The video also demonstrates what happens when the body finally fails. Graphic footage of childbirth is included.

#BBC045-NR15 \$189.95

Building Your Brain

The human brain is so sophisticated it takes more than 20 years to mature, making brain remodeling an essential part of growing up, as this program shows. Viewers find out how a newborn baby makes sense of the world—and meet a 1-year-old who copes with only half a functioning brain, Moken "sea gypsy" children who train themselves to see clearly underwater, a Vietnamese girl who speaks 11 different languages, and a 13-year-old stock car racer who proves that teenagers like to take risks. The video also looks at scans that display just how many brain connections are lost between the ages of 11 and 20.

#BBC046-NR15 \$189.95

Hostile World

With each inhalation, human beings take in potentially lethal microbes, while life-sustaining sunlight can also cause irreparable damage to DNA. This program explains how the body defends itself against these and other threats. Viewers are introduced to a bull jumper whose muscles give him the strength to avoid a violent death, a 3-year-old whose internal army fights off the flu, and a man who gets injured constantly to earn his living. The video also includes incredible footage of Richard Edwards' radical double hand transplant as it shows how surgeons use medical expertise to exploit the body's natural healing abilities.

#BBC047-NR15 \$189.95

A W5 investigation into the sudden rise in childhood narcolepsy

Sleeping Sickness: W5

Grades 11-Post Sec 20 min 2013 CTV

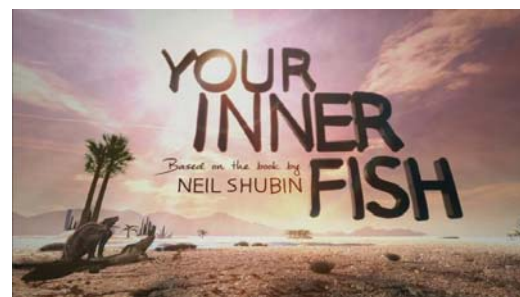

It's a medical mystery. Why are children all around the world developing severe narcolepsy -- a rare sleeping disorder with no known cure? W5 investigates the story of a young girl who suffers from narcolepsy and gets an inside look at how the child's condition affects the whole family. Avis Favaro speaks to medical experts about the investigation on the link between vaccines and children with narcolepsy.

Cell Biology: Structure, Function and Processes Series

Grades 9 – Post Sec 2014 20 min ea CC Films Media Group

They are the basic building blocks of life, but in reality there's nothing "basic" about cells - the complex, versatile units of matter that make up all life on Earth. In this four-part video series, rich animation brings the intricate inner workings of cells to life, while a congenial host guides viewers through the essentials of cell biology: cell structure and function (of both animal and plant cells), cell metabolism and respiration, cell division and growth, and a focus on stem cells, cellular differentiation, genetics, and the potential that stem cells have for medical use. No-nonsense and to the point, each video is an arrangement of short, discrete segments that make this series ideal for breaking up lectures.

SPECIAL SERIES PRICE – ONLY \$559.80

Individual titles: \$149.95

Cell Structure and Function

This program explores the basic structure of both animal and plant cells and the specific functions that different cell components serve. After an overview of a complete cell, individual segments dive in to detail each of the specific parts. Discrete, pedagogical segments cover: the plasma membrane, extracellular matrix, flagellum and cilia, the nucleus, nucleolus, nuclear envelope, cytosol and cytoplasm, the rough and smooth endoplasmic reticula, the golgi apparatus, ribosomes, lysosomes, vacuoles, peroxisome, and mitochondria. Where plant and animal cells different is made clear, and separate segments on structures unique to plants include the cell wall, plasmodesmata, and chloroplasts.

#394521-NR15 \$149.95

Cell Metabolism and Respiration

All living organisms need energy to perform day-to-day tasks. Using straightforward, vibrant animation to anchor otherwise complex ideas, this program shows how that energy is created through the metabolic processes of catabolism, aerobic cellular respiration, and anabolism. Respiration is covered in depth, with detailed explanations of glycolysis, the Krebs cycle and the electron transport chain. Also covered is fermentation and anaerobic cellular respiration, and how cells help build large, complex molecules through the process of anabolism.

#394522-NR15 \$149.95

Cell Division and Growth

The cell cycle is a series of developmental and growth events that chart the normal life of a cell. This program uses easy-to-follow animation to illustrate the growth phases of the cell cycle and the processes of mitosis and cytokinesis that follow. The distinct phases of mitosis—including prophase, metaphase, anaphase and telophase—are described in detail. The program also explains meiosis, a variation of mitosis involving the formation of gametes in two stages. Apoptosis, or programmed cell death, is also covered, including the effects of uncontrolled cell division (cancer).

#394523-NR15 \$149.95

Stem Cells and Cellular Differentiation

That a tiny collection of cells can divide, multiply, and transform into the proper combination of lung cells, brain cells, bone, muscle, and more—eventually becoming a fully formed human being—is often referred to as the miracle of life. But at the cellular level, this is the story of stem cells, cellular differentiation, and gene expression. This program explores these topics, detailing the different types of stem cells (embryonic and adult), and when they leave the cell cycle to enter differentiation. Cell mutation, gene expression, and the process of epigenetics are also covered. Stem cell potency is also reviewed, as is the role and promise of stem cells in medical research, including the pros and cons of using embryonic versus adult-derived stem cells.

#394524-NR15 \$149.95

After Life:

The Strange Science of Decay

Grades 11-Post-Sec 2011

50 min CC BBC

Imagine an average family kitchen. The fridge and cupboards are well stocked. There are flowers on the table. There's even a dead mouse on the counter and flies gathering above the fruit bowl. Over a period of three months, this film reveals the incredible science of taphonomy, following what happens to the organic matter in this kitchen as it starts to decompose. *After Life* is a journey through the heart of decay—from the towering branches of *Aspergillus* mold to the spread of slime mold across a loaf of bread.

Do You See What I See?

The Science of Color Perception

Grades 9-Post Sec 2011

50 min CC BBC

This program explores what colour really means to us, with expertise drawn from the realms of neuroscience, evolutionary biology, and art. Shedding light on the role of color in the animal world and how it influences moods and reactions, the film features brain researcher Beau Lotto, who conducts a series of experiments to prove that perception is key.

Hubble's Canvas Series

Grades 7-Post Sec 2007 CC 25 min ea Blue Ant Media

See the story of one of humankind's most stunning scientific achievements. The Hubble Space Telescope has created striking images of breathtaking beauty that form a direct connection between the human spirit and nature's most powerful forces.

SPECIAL SERIES PRICE – ONLY \$654

Individual titles: \$119

Series Product #BAM027-NR15

Streaming Price (3 year term): Single School – K-12: \$179 each

Eye of the Beholder

Eye of the Beholder – Hubble was created to dispense with the biggest problem in astronomy, the interference

caused by earth's atmosphere. A daring rescue turned a billion dollar failure into the most stunning instrument ever created for studying the universe.

Universe in Bloom – Monet had his water lilies, Hubble has its planetary nebula, the most colourful, delicate and beautiful objects in the universe. Each of these cosmic butterflies is composed of a puff of gas, expelled and illuminated by a dying star. They come in a variety of shapes, which helps astronomers understand what the stars were doing in their final stages of life.

#BAM028-NR15 \$119

Painted by Light

Painted by Light – The universe paints pictures with light, so to understand what a Hubble picture can reveal about the universe, it's necessary to understand how light is emitted, absorbed and reflected by stars, gas and dust. Light can even echo like sound, illuminating different parts of a dust cloud at different times.

Masterpiece – A look at the single largest and best Hubble image ever acquired, the giant mosaic of the Orion Nebula. It's the nearest starforming region, a place where stars and planets are being born before our eyes.

#BAM029-NR15 \$119

Colour

Colour – Every Hubble image begins in black and white, so why are Hubble's pictures so colourful? The telescope has a wide range of filters that can be assigned different colours. Sometimes they are assigned to be as close as possible to what the human eye sees and sometimes they are made to look vivid and unnatural to bring out hidden detail.

Violent Endings – Not all stars will bow out gracefully, like celestial flowers. The largest stars explode with a terrifying force and briefly shine like beacons across the universe. A supernova's swift burst of incredible energy forges the entire universe's supply of precious metals like gold, silver and platinum. Hubble can show us the remnants of these massive explosions in exquisite detail.

#BAM030-NR15 \$119

Cosmic Perspective

Cosmic Perspective - Our ancestors thought the sky was flat, but we now know it as a place of infinite depth. Only Hubble can make the jump across those huge distances with stunning clarity. This is an outward-bound journey from "here to infinity" showing all the scales where Hubble operates, from the solar system to the most remote reaches of the cosmos.

Etched in Time – Hubble not only looks out into space, it looks back in time. The further light travels to reach the telescope the further back in time we see the object that emitted the light. Hubble can actually look to the time when the galaxies were still assembling. It's a violent process that carries on today as massive galaxies collide.

#BAM031-NR15 \$119

Grand Design

Grand Design – The forces of nature, operating at large and small scales create a universe of symmetry and form. Now we consider the interplay of those forces in creating structures as dramatic as Saturn's rings and the Whirlpool Galaxy, a classic example of a grand design spiral.

Stretching the Canvas – By watching how galaxies rotate, astronomers realized there must be something else there that is invisible but exerts a powerful gravitational pull. This is dark matter. It has an amazing influence on the universe, forming a "gravitational lens" which distorts our view of distant stars, but also keeping gravity from pulling the universe in on itself. The Hubble Space Telescope not only has allowed us to learn more about dark matter, but about dark energy, the mysterious force that is causing the universe to accelerate outwards. That discovery helped resolve one of science's great mysteries, the age of the universe.

#BAM012-NR15 \$119

Vanishing Points

Vanishing Points – There are monsters loose in the cosmos, giant black holes that devour matter and spit out high-speed jets of atoms. These monster black holes offer our best chance to study how the laws of physics operate under the most extreme circumstances. The challenge is that these black holes are buried in the hearts of galaxies. Hubble is the best tool we have for peering into these dense regions of space and showing us what's really going on. In fact, we have our own monster black hole in the Milky Way.

Still Life? – Hubble has revealed a universe of stirring beauty, one that seems tailor made to produce creatures that can view and enjoy it. Our understanding of star formation tells us that we are a species created by the stars. We are, in effect, pieces of the universe looking back at itself.

#BAM033-NR15 \$119

Cosmic Vistas Series

Grades 7-Post Sec 2009-2013 25 min ea CC Blue Ant Media

Learn how mysteries are being unraveled through the most beautiful images ever captured of our universe. From extreme close ups of our nearest cosmic companion the moon, to images of galaxies 15 billion years away Cosmic Vistas will show and explain how scientists are trying to get the big picture of existence.

SPECIAL SERIES PRICE – ONLY \$2376 Series Product #BAM034-NR15 (Includes 4 seasons/ 24 programs)

Individual titles: \$119

Streaming Price (3 year term): Single School – K-12: \$179 each

Season 1- Series #BAM035-NR15 \$654 (6 programs)

Windows to Other Worlds – Fountain of Creation

How humans discovered the planets and how a few moving lights in the sky became a rich and complex solar system.

#BAM036-NR15 \$119

Rocky Shores – Silent Partner

Mercury offers us a look at a solid world and the forces that shape it. With substantially more matter and a thicker atmosphere, Venus tells an even more complex story.

#BAM037-NR15 \$119

Borderland – Red Dawn

The moon is our nearest neighbour in space and the keeper of some of our oldest secrets. It is also our cosmic stepping stone to a future among the planets.

#BAM038-NR15 \$119

Lords of Gravity – Outer Limits

Thanks to a fleet of advanced spacecraft orbiting around and even landing on the surface of Mars, a new portrait of this red planet is emerging. Mars is teetering on the border between a living and a dead world.

#BAM039-NR15 \$119

Hidden Havens – Icy Gems

The gas giants of the outer solar system, Jupiter, Saturn, Uranus and Neptune, represent very different kind of planets, with exotic atmospheres, liquid interiors and rings.

#BAM040-NR15 \$119

Shooting Gallery – Galactic Visions

Looking to beyond the rocky and gaseous worlds, to the dark domain of Pluto and beyond, we may find the history of the solar system preserved for us in a deep freeze.

#BAM041-NR15 \$119

Season 2- Series #BAM042-NR15 \$654 (6 programs)

Hubble's Renaissance

Thanks to a dramatic repair mission, the Hubble Space Telescope has another chance to capture more stunning pictures like only it can.

#BAM043-NR15 \$119

Superscopes

Gigantic telescopes of the future with multiple mirrors working in unison like the Spitzer Space Telescope, will see further than the Hubble Space Telescope, and possibly get our first pictures ever of another planet that can support life as we know it.

#BAM044-NR15 \$119

Cosmic Rainbow

In the world of astronomy, how do we overcome the limits imposed by our own eyesight? The universe comes alive by viewing the cosmos in infrared light to gamma radiation.

#BAM045-NR15 \$119

Stargazer's Paradise

High in the mountains and far removed from the light pollution of big cities, the Atacama Desert in Chile provides some of the best views on Earth of the night sky. Advanced telescopes gather images that rival, and sometimes surpass the Hubble Space Telescope.

#BAM046-NR15 \$119

Night Fire

The Northern Lights are more than just beautiful. They tell us about the make up of our planet, our sun, and may even be a signpost for the possibility of life on other planets.

#BAM047-NR15 \$119

Virtual Universe

Computer simulations are helping us see what it's like to fly over other worlds and how galaxies interact over millions of years.

#BAM048-NR15 \$119

COSMIC VISTAS

Season 3-Series #BAM049-NR15 \$654 (6 programs)

Seasons of Saturn

It's the second largest, and grooviest looking planet. It's also a mini-solar system with 60 moons (most of them recently discovered) and those crazy rings. It's also one of the most studied and most photographed planets in our neighbourhood.

#BAM050-NR15 \$119

Vesta Unveiled

With the Dawn mission's exploration of the asteroid Vesta and the dwarf planet Ceres, asteroids are a hot topic. We'll see what's new in big floating space rocks.

#BAM051-NR15 \$119

Water Worlds

We take it for granted here on Earth, but it's in short supply in the rest of the solar system, at least in liquid form. The search for water is actually the search for life, and that search is taking us to some unusual places, including a moon of Saturn that is shooting liquid water into space.

#BAM052-NR15 \$119

Gravity

Gravity sucks but where would we be with out it. Scientists are now probing to detect gravity waves in space. They are also mapping the gravity patterns of the moon for the first time.

#BAM053-NR15 \$119

Science and the Shuttle

For more than 25 years the shuttle was our ticket to space, and our laboratory in orbit. So did it teach us about its playground?

#BAM054-NR15 \$119

Landing on Mars

Like a nosy neighbour we just can't learn enough about Big Red. Despite having boots on the ground (well, treads and wheels) the vast majority of information is being gathered by orbiters who are chronicling everything they can. What's the latest news?

#BAM055-NR15 \$119

Season 4 - Series #BAM056-NR15 \$654 (6 programs)

The Milky Way

This episode explores the Milky Way from the mythology of ancient sky watchers to how scientists are mapping it from the inside out.

#BAM057-NR15 \$119

The Big Bang

This episode explores the science behind the birth of the universe. Throughout history our nightly view of the universe has fueled our collective imagination, helping give birth to great art and deep insights. But when it comes to the birth of the universe, not even the most creative work of imagination can rival what science has revealed about the Big Bang.

#BAM058-NR15 \$119

Hot Zones

This episode takes a close look at Mercury's moment in the sun. Mercury is one of the nearest planets to earth, but for centuries it eluded astronomers' best efforts to learn its secrets. But that has changed thanks to missions like Mariner and more recently, Messenger. This episode takes a close look at Mercury's moment in the sun.

#BAM059-NR15 \$119

Cosmic Rays

This episode takes a close look at how they are produced at what that can tell us about the universe. Cosmic Rays are not simply another form of light. They carry information about powerful and unseen processes at work thousands or even millions of light years away. This episode takes a close look at how they are produced at what that can tell us about the universe.

#BAM060-NR15 \$119

Fermi Paradox

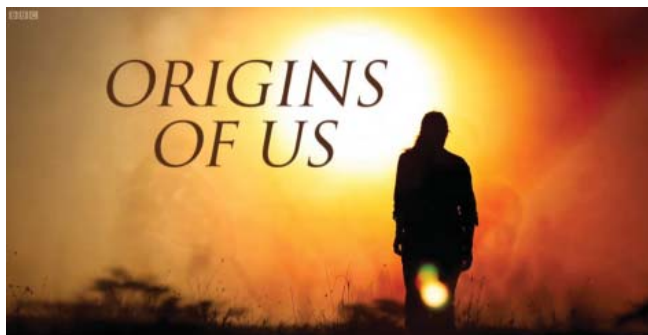

This episode asks why no other civilization has presented itself in the Universe. The Fermi Paradox asks the ultimate question: Given a few reasonable assumptions about the chance of life arising elsewhere in the universe and the distances between the stars, why has another civilization not presented itself?

#BAM061-NR15 \$119

Landsat

This episode takes a look at Landsat 8, the advanced planetary explorer with a 900 million dollar price tag. Landsat is an advanced planetary explorer designed to peer across multiple wavelengths to reveal complex and ever-changing details that are undetectable by the human eye.

#BAM062-NR15 \$119

Origins of Us Series

Grades 11-Post Sec 2011 CC 52 min ea BBC

Within the human body lies evidence of how we evolved away from the early apes to become the most successful species on Earth. But each anatomical advantage that put us ahead of predators and competitors came at a cost, which many of us are still paying today. Bad backs, painful childbirth, and impacted wisdom teeth are all by-products of our evolutionary triumph. In this three-part series, anatomist and physical anthropologist Dr. Alice Roberts reveals the key adaptations to the human body that led to our dominance, and how these play out in our lives today.

SPECIAL SERIES PRICE – ONLY \$539.85

Individual titles: \$189.95

Series Product #BBC051-NR15

*Streaming Price (3 year term): Single School – K-12:
\$225 each*

Bones

In this program, Dr. Alice Roberts charts the advance from Australopithecus to Homo erectus and beyond to demonstrate what the modern skeleton reveals about human evolution. Along the way, viewers learn what running shoes to wear, the purpose of armpit hair, and whether back pain is an inevitable consequence of simply standing up.

#BBC052-NR15 \$189.95

Guts

In this program, Dr. Alice Roberts explains how our ancestors' search for food has driven the way we look and behave today, from the shape of our face to relationships and gender roles. Visiting hunter-gatherers in Tanzania, she also investigates what type of diet we are designed for, and whether humans were meant to be monogamous.

#BBC053-NR15 \$189.95

Brains

Drawing on research into social politics among chimpanzees, the cognitive development of children, and the ancient tools that have been found littered across the Rift Valley, in this program Dr. Alice Roberts explores how Homo sapiens developed such large brains—and asks why we are the only species of our kind left on the planet today. She also discusses how caring for large-brained offspring has shaped civilization, and the evolutionary adaptation that allows grandmothers to help raise their grandchildren.

#BBC054-NR15 \$189.95

HISTORY

Time Scanners Series

Grades 9-Post Sec 2014 60 min ea CC PBS

With cutting-edge technology that can “read” buildings, ruins and landscapes from ancient worlds, this series reveals physical and forensic history, allowing viewers to reach out and touch the past.

Time Scanners: Egyptian Pyramids

Grades 9-Post Sec 60 min 2014 CC PBS

Follow world famous structural engineer Steve Burrows, as he and the Time Scanners team travel to Egypt to scan the pyramids, the tombs of the mighty pharaohs. To find out how these buildings evolved from simple mud-brick structures to some of the most impressive buildings in the world, Steve and the team use groundbreaking laser technology to scan the structures and reveal secrets previously unknown.

The Hidden Art of Islam*Grades 9-Post Sec 60 min 2014 CC PBS*

Explore the tradition of figurative art at the heart of Islam with host Rageh Omaar. Muslim belief and tradition specifies that there should be no depictions of God or the Prophet Muhammad. In religious contexts, this constraint on what artists can depict extends to human figures and other living creatures as well. These prohibitions have inspired a rich visual culture based on calligraphy, Arabesque floral designs, and geometry, all of which feature strongly in the art and design found throughout the Muslim world, including mosques. With the help of fine art and religious experts, host Rageh Omaar (The Life of Muhammad) traces the effect of these beliefs over the centuries on the art and artists of the Islamic world and considers why depictions of pilgrims taking part in the Hajj pilgrimage have become part of the accepted tradition of Islamic art, including in work exhibited at the British Museum.

Crowdfunding and Grants Series

Grades 9-Post Sec 2014 18-20 min ea/2 parts CC Films Media Group
Lots of people have great ideas and enthusiasm for projects that will make the world a better place, help their community, or advance their own goals, but few know how to take their great idea and turn it into a reality. This two-part series explores two popular fundraising methods—grant writing and crowdfunding—and breaks down the two most essential parts of the process: crafting a persuasive argument for why your project is worth funding, and putting together a solid budget for how much the project will cost. Using examples of a garage band looking to record their first album (crowdfunding) and a nurse looking to start a local elder care awareness initiative (grants) this program is a timely, essential series for budding entrepreneurs, artists, and advocates.

SPECIAL SERIES PRICE – ONLY \$219.90

Developing a Persuasive Proposal: Crowdfunding and Grants

Does your garage band want to record a studio album? Are you trying to raise money for a worthy community cause? Finding money for your cause or program can be difficult if you don't know where to begin. This program explores two popular fundraising methods—grant writing and crowdfunding—to help you identify likely funders and develop a winning proposal or crowdfunding campaign. How do you find the right foundation to match your vision? What are the differences between crowdfunding platforms like Kickstarter and Indiegogo? Regardless of the path you choose, writing clearly and persuasively is the key to successfully attracting the attention and approval of donors. Using examples of a garage band looking to record their first album (crowdfunding) and a nurse looking to start a local elder care awareness initiative (grants) this program provides easy steps and winning tips to help you reach your funding goals.

#394538-NR15 \$119.95

Reaching Your Financial Goal: Crowdfunding and Grants

For many people, the hardest and most overwhelming part of preparing a grant request or crowdfunding campaign is the budget. This program breaks down the basics of what a budget should include, as well as how to create budgets that are clear and realistic. Areas discussed include the budget narrative, direct costs, shared costs or in-kind contributions, and matching grants. This program also explores what makes a successful crowdfunding campaign, from understanding the funding platform rules and fees to creating a pitch video and using social media to grow your base of supporters and donors. There is an art to knowing just what perks to offer donors for their various levels of support, and winning a grant often has more to do with building solid fiscal relationships than the merits of the project alone. This program is essential viewing if you are trying to raise money for that dream project!

Social Media for Business Marketing

The use of social media to promote business is one of the fastest - growing areas of marketing today. When used correctly, popular social media platforms offer the ability to connect - easily, affordably, and directly - with customers and prospects to build brand awareness and loyalty, improve customer service, and much more. How, then, should a company go about implementing social media as a part of its marketing mix? This program clearly and concisely explains how to get started with social media; make the most of Facebook, Twitter, LinkedIn, Pinterest, Instagram, and Yelp; and develop and manage a comprehensive social media marketing strategy.

#394506-NR15 \$119.95

Online and Mobile Business Marketing

There was a time when companies debated whether having a Web site would be useful in an overall marketing strategy. Today, a business Web site paired with a mobile app and supported by a nuanced online marketing strategy is a necessity in order to serve an increasingly technosavvy customer base. This program gives a detailed overview of how companies can create and maximize an online/mobile presence starting with the basics - goal-setting, search engine optimization, the user experience, and traffic analysis—and finishing with more advanced promotional considerations such as Web site tie-ins (e-newsletters, blogs, social media); mobile apps; online/mobile/offline advertising (Google Ad Words, Facebook Mobile Ads, QR codes); and text message marketing.

Generation Like: Frontline

Grades 9-Post Sec 2014 60 min CC PBS

From the producer behind FRONTLINE's *The Merchants of Cool*, examine the evolving, complicated relationship between teens and the companies that target them. Thanks to social media, today's teens are able to directly interact with their culture—artists, celebrities, movies, brands, and even one another—in ways never before possible. But is that real empowerment? Or do marketers still hold the upper hand? In *Generation Like*, author and FRONTLINE correspondent Douglas Rushkoff (*The Merchants of Cool*, *The Persuaders*) explores how the perennial teen quest for identity and connection has migrated to social media—and exposes the game of cat-and-mouse that corporations are playing with these young consumers. Do kids think they're being used? Do they care? Or does the perceived chance to be the next big star make it all worth it? The film is a powerful examination of the evolving and complicated relationship between teens and the companies that are increasingly working to target them.

Simply Speaking

Grades 9 – Post Sec 2013 CC 40 min Tumbleweed Entertainment

Has public speaking become a dinosaur? In the age of blogs, texting, Twitter and Facebook, has the traditional art of communication via spoken words, eye contact, vocal inflections and nonverbal gestures become less popular? Are gifted speakers those rare creatures born with charisma and unique style? The answer is definitely no. Accomplished speakers all have skills that can be learned, practiced and mastered by anyone with the desire to motivate and move others. *Simply Speaking* is a tool for teachers, students, and adult learners who wish to become proficient in their communication skills.

The ability to express one's thoughts verbally to produce a clear message in spoken language is a vital skill illustrated. From highstakes situations, such as interviews or presentations, to social interactions, the ability to interact and communicate through speech and language is necessary for success in life. This DVD and guide set present examples of individuals who demonstrate the road to successful public speaking. They show how motivation and dedicated practice can help someone advance and become a polished presenter.

Investigative Reporting in the Digital Era

Grades 9-Post Sec 2014 17 min CC Films Media Group

In the new world of tweets, blogs, and citizen journalism, what is the outlook for true investigative reporting? This program highlights the ways investigative journalism is changing, particularly in the context of digital and online media. Social media and globalization have changed the ways reporters connect with their readers. What are the advantages and disadvantages of nearly instantaneous access to news as it unfolds? A panel of heavy hitters from the world of journalism weighs in on these and other issues, such as emerging financial models for (costly) investigative reporting as traditional news budgets shrink. Young reporters entering the field will be particularly encouraged by many of the exciting technologies and resources available for developing stories that are more in-depth, media-rich, and engaging. Investigative journalism is a fast-evolving field, and this program helps entry-level reporters as well as veterans to bear witness more effectively in the Internet era.

That's Art?! Series

ON-CORE

Grades 9-Post Sec 2012 24 min ea CC Blue Ant Media

Art is all around us: tattoos, graffiti, movie posters and book covers. *That's Art?!* introduces you to the people that create 'the Art of the Every Day.' You might not have heard of them – but you've seen their work. *That's Art?!* also profiles the biggest, most influential artists working in unusual mediums – creative geniuses that make art out of Lego, desserts and even dead animals. *That's Art?!* will surprise, amuse and amaze you.

SPECIAL SERIES PRICE – ONLY \$1308

Individual titles: \$119 each

Series Product #BAM063-NR15

Streaming Price (3 year term): Single School – K-12: \$179 each

That's Art: Episode 1 - Nathan Sawaya, Mediah, & Bob McKay

In the series premier, *That's Art?!* takes you into the studio of Nathan Sawaya, a former lawyer, who gave up the courtroom for a life of making sculptures out of Lego. We follow the career of notorious graffiti artist Mediah – who has morphed from a punk teenager running from the cops, to a corporate powerhouse in the world of graphic design. And we bend steel with one of North America's most celebrated custom motorcycle builders: Bob McKay.

#BAM064-NR15 \$119

That's Art: Episode 2 - Paul Booth, David Arrigo, & Roger Wood

That's Art?! dives into the depths of the darkest corners of the human soul with tattoo artist Paul Booth –The rock star of New York's tattoo scene. David Arrigo shows what it takes to put art on the helmet of an NHL goalie. Meanwhile, Roger Wood explains the philosophy behind "Steam Punk" art and why you should try this at home.

#BAM065-NR15 \$119

That's Art: Episode 3 - Matthew Reinhart, Paul Ferrara, & Michael Parks

Every child loves pop-up books. And let's face it, so do most adults. Meet Matthew Reinhart: a master of the craft. Matthew draws, paints and builds pop up books that delight readers all over the world. Every Harlequin novel has a beautiful mistress and a brave hero; they also all come with a cover illustration that stirs the emotions of the reader before they've even read a word. Jon Paul Ferrara is the painter behind those breath-taking images. And *That's Art?!* goes into the workshop of Michael Parks – a master builder of quirky and unique tobacco pipes.

#BAM066-NR15 \$119

That's Art: Episode 4 - Tara McPherson, Dan Witz, & Graham Humphries

Tara McPherson admits she was a science geek in high school, and almost gave up her art for astronomy. Once you get a look inside her studio, you'll be glad she stuck with the art! Dan Witz is a legendary bad boy in the world of street art. He shares his opinions on how to behave at dinner parties and where to find the best place to put a hummingbird. And while Graham Humphries lives in a world of zombies and serial killers, *That's Art?!* discovers he's not such a bad guy once you get to know him.

#BAM067-NR15 \$119

That's Art: Episode 5 - Polly Morgan, Brian Ewing, & George Holancin

Stuffing a dead bird inside a broken light bulb might seem odd... even perverted or gross. But Polly Morgan makes it strangely beautiful. The world's most provocative taxidermist is taking the art world by storm. When it comes to posters.... Brian Ewing is the go-to guy for some of the biggest bands in rock & roll. But you might be surprised to find out he has a background in an even seedier profession. And George Holancin has lived quite a life. From a summer job in a uranium mine, to a cover model in the world of high fashion, to welding rusted bits of farm machinery in the family barn.

#BAM068-NR15 \$119

That's Art: Episode 6 - Albizi Rondon, Mary Wing To, & Pat Godin

You've probably never met Albizu Rondon, but odds are you've seen his work. He designs baseball hats for New Era Caps—the biggest, most famous cap making company in the world. His work is worn by everyone from teenage punks to movie stars. Mary Wing To is a fashion designer that makes clothes for humans and animals... from risqué leather accessories to horse harnesses stylish enough for a royal wedding. And, Pat Godin is an eleven-time world champion in the field of duck decoy carving. His creations can fool even the most supplicated waterfowl experts.

#BAM069-NR15 \$119

That's Art: Episode 7 - David Finch, David Johnston, & Nikole Lowe

David Finch dropped out of high school in Grades 11. Twenty years later he is one of the super stars of the comic book world: Drawing Batman for DC comics. Dave Johnston is known simply as "Chalkmaster." He creates amazing three dimensional pictures on the sidewalk much to the delight of his millions of fans. And Nikole Lowe is the happiest, most open-hearted tattoo artist you'll ever meet. That's Art?! goes inside her studio to enjoy a moment of peace.

#BAM070-NR15 \$119

That's Art: Episode 8 - David Lozeau, Katya Trischuk, & Carl Wiens

Celebrate the "Day of the Dead" with lowbrow artist David Lozeau. His smiling skulls will dance their way into your heart and liven up your home. It doesn't have to be Easter to enjoy painted eggs. Katya Trischuk is creating tiny masterpieces all year round using traditional techniques and very modern designs. And Carl Wiens explains how the editorial cartoons in the New York Times are created. The most surprising thing is "where" they are being drawn.

#BAM071-NR15 \$119

That's Art: Episode 9 - Marc Silvestri, Susan Triano, & Zab Hobart

Marc Silvestri is one of a handful of artists that had the courage to shake up the status quo. He faced off with Marvel Comics and DC Comics... and twenty years later... he's still doing it his own distinct way. Susan Triano makes the most beautiful and delicious cakes you've ever seen. From birthdays to weddings to corporate galas, and she does it all with a flourish. And Zab Hobart makes wallpaper unlike anything you've ever seen. She uses letters and numbers the way other artists use patterns and pictures. It is an incredibly unique approach to decorating your home.

#BAM072-NR15 \$119

That's Art: Episode 10 - Kosh & Tracy Lee Stum

You might not know it, but you probably have some of Kosh's art in your basement. He is the creative genius behind such iconic album covers as "Abbey Road," "Who's Next?" and "Hotel California." He is a three time Grammy winner whose career spans 30 years of music: From the Pointer Sisters to Weird Al Yankovic. Tracy Lee Stum has painted on sidewalks all around the world. She is a world leader in stunning 3D effects.

#BAM073-NR15 \$119

That's Art: Episode 11 - Drew Struzan, Buff Monster, & Sam Radoff

Drew Struzan has gone from being a poor kid in Oregon City, to becoming Hollywood's most celebrated poster artist. His bold brushwork has defined some of the greatest movies and characters in modern cinema: From Star Wars to Harry Potter. Buff Monster's cuddly characters appear on everything from billboards to trading cards... and they're all pink. And Sam Radoff has been making art for almost 70 years. He started painting on cars but he's ended up in high priced galleries.

#BAM074-NR15 \$119

That's Art: Episode 12 - Jon Kalssen, Erica, & Dan Bergeron

Jon Klassen has won awards for his illustrations. What really matters to him is the smile on a child's face as they learn to read with his beautiful books. Erica is part of a new wave of graffiti artists. She isn't interested in vandalism or egocentric tags, she wants to bring beauty and love to the streets. Dan Bergeron also does street art – but it's a very different style. He uses photographs of faces to disrupt your day and make you stop and think.

Vaping: Cool New Trend or Ticket to Nowhere?

Grades 7-12 2014 20 min CC Human Relations Media

This video and print curriculum addresses the new craze of vaping drugs (nicotine, alcohol, liquid marijuana and others). Through interviews with teen users and medical professionals, this program clearly demonstrates the serious health risks of vaping, including drug overdose, instant high or drunk, alcohol poisoning, and impaired thinking and decision making. Explains that vaping delivers an unknown dose of drugs or alcohol directly to the brain. Vaping nicotine carries the additional risk of accidental swallowing of liquid nicotine which has put hundreds of teens into ERs. Vaping pens make it easy to disguise marijuana use because there is little or no odour.

Pothead

Grades 7-12 2014 20 min CC
Human Relations Media

Pothead tells the fictional story of Trevor, a teen becoming gradually addicted to marijuana as his grades slip, his relationships with his parents and friends become strained, and his motivation to do things other than smoking marijuana diminishes. As Trevor's downward spiral plays out, the program weaves in interviews with teens who were potheads, but managed to turn their lives around. Their stories provide a thought-provoking counterpoint to Trevor's story, underscoring the message that addicted teens can change their lives for the better.

Over-the-Counter Drugs: What's In Your Medicine Cabinet?

Grades 7-12 2014 20 min CC
Human Relations Media

With names like Triple C, Purple Drank, and Robo, teens are turning more and more to their own medicine cabinets to get high. And because over the counter drugs can be purchased legally, teens assume they must

be safe, at any dosage. This program looks at the 5 most abused OTC drugs: dextromethorphan (DXM), found in many cough medicines; pain killers, like acetaminophen and ibuprofen; caffeine medicines and energy drinks like NoDoz and 5 Hour Energy and diet pills. When these medications are abused they can lead to stomach bleeding, kidney failure, panic attacks, high blood pressure, heart damage, permanent brain damage and even death. Viewers will meet real young people who talk openly and honestly about the adverse side effects of these drugs and learn the very sad story of one teen who lost his life.

Bath Salts and Other Synthetic Drugs: Think About It

Grades 11-Post Sec 18 min 2014
CC Films Media Group

Total memory loss of recent events. Hallucinations of monstrous proportions. Horrific violence that has even been known to include cannibalism. Filmed with a primary focus on "bath salts" (synthetic cathinones), this video

examines readily available designer drugs that can produce powerful highs while exposing the immensely damaging effects such chemicals cause to the brain and other organs when ingested. A police officer, a toxicologist, an addiction counselor, and a recovering addict talk seriously and frankly about substance abuse and its life-wrecking effects in a way that will make viewers take notice, while a what-if dramatization of a young teen who dies of a bath salts overdose will leave viewers thinking about the power of peer pressure—both face to face and via texting.

MOLLY:

Innocent Name, Deadly Drug

Grades 7-Post Sec 2014 20 min CC
Human Relations Media

Molly, a pure form of Ecstasy or MDMA, is the new, hot drug of choice for many young people who falsely believe the

drug is safe. Often handed out at raves and electronic music festivals, Molly is exposed as the grave danger that it really is. Interviews with former Molly users, drug experts and a parent of a teen who died after taking Molly, drive home the message that taking Molly is playing Russian Roulette with your life.

What's Up with E-Cigarettes?

Grades 7-Post Sec 2014 CC 20 min
Human Relations Media

Teens' use of e-cigarette and other electronic vaping devices has skyrocketed. Kids think e-cigarettes are a "safe" alternative to smoking. This program gives students the facts and urges extreme caution. Viewers learn the truth about nicotine addiction and its impact on health. They will understand that the supposedly "safe" water vapour contains other harmful chemicals as well. Viewers will also learn that big tobacco companies are using advertising techniques to lure in users and hook them for life.

Heavy Burden:W5

Grades 7 – Post Sec 40 min 2014 CTV

Regardless of age, obesity can bring on a raft of health concerns including diabetes, high blood pressure, shortened life expectancy and limited mobility. But for children and teenagers, those health problems are often compounded by less obvious side effects – teasing, bullying, isolation, and even missing school and staying away from public places to avoid the taunting. It's these kinds of stories that many teenagers have reported to doctors at Toronto's Hospital for Sick Children, home to the ground-breaking and multi-disciplinary SickKids Team Obesity Management Program, more commonly known as STOMP. W5 follows two teens through a radical program to treat their obesity and help them find normal lives.

Streaming Price (3 year term): Single School – K-12: \$149 each

Passamaquoddy Bay Shellfish: Aerni Rossmount

Swiss Chef Chris Aerni's Rossmount Inn Restaurant changes its menu on a daily basis to accommodate the freshest ingredients land and sea has to offer. Chris dives for scallops in New Brunswick's Passamaquoddy Bay. He collects fiddleheads, samphire greens, cattail hearts, clams, and periwinkle snails.

#291001-NR15 \$99

Qu'appelle Valley Mule Deer: Dickie Yuzicapi

"Sioux Chef," Dickie Yuzicapi, creates modern variations on traditional Aboriginal cooking. In summer and fall trips through Saskatchewan's Qu'Appelle Valley, he hunts a mule deer and rabbit. He combines these with gathered sage, chokecherries, and rosehips, which he serves to a few local friends.

#291002-NR15 \$99

Kananaskis Ring-Necked Pheasant: Michael Decker

Chef Michael Dekker's Calgary restaurant Rouge, is world-renowned for using sustainable ingredients. He visits family friends on a ranch in Kananaskis to hunt Ring-Necked Pheasant. He combines the bird with Thistle Root and Greens, Saskatoon, Kinnikinnick, and Bear Berries.

#291003-NR15 \$99

Newfoundland Moose: Jeremy Charles

Newfoundland's Jeremy Charles enjoys a hunt with family friends near his grandfather's hometown. There, they kill a moose, a partridge, and gather wild berries. The meal is served for his friends -- fishermen who sustain themselves on little more than local wild and gardened ingredients.

#291004-NR15 \$99

Lac La Ronge Lake Trout: Moe Mathieu

Chef Moe Mathieu uses local ingredients in his Saskatchewan restaurants. In the fall, he travels to Lac La Ronge where he harvests wild rice, chanterelle mushrooms, blueberries, and rosehips. Returning in the dead of winter, he nets lake trout, whitefish, and burbot through the ice.

#291005-NR15 \$99

Vancouver Island Dungeness Crab: Sinclair Philip

Sinclair Philip's Sooke Harbour House, on Vancouver Island, features an edible landscape of over 200 herbs, greens, flowers, and vegetables. Chef Robin Jackson and restaurateur / forager Sinclair Philip search the area's seashore, forests, and rivers for salmon, crab, crayfish, seaweed, and mushrooms.

#291006-NR15 \$99

Grey Highlands Rainbow Trout: Aaron Bear

Chef Aaron Bear Robe used to operate the Aboriginal themed restaurant Keriwa Cafe in the bustling metropolis of Toronto. He would escape briefly for a peaceful retreat north of the city, where he fished for rainbow trout, and gathered wild leeks, fiddleheads, and ginger root.

#291007-NR15 \$99

BC Interior Fowl: Ben Genialle

Chef and instructor Ben Genialle creates a fusion of traditional Aboriginal and contemporary foods. He hunts duck, grouse, and snowshoe hare; and gathers skunk cabbage, gooseberries, and Oregon grapes near BC's Shuswap Lake.

#291008-NR15 \$99

Port Alberni Salmon Feast: Dolly McRae and Annie Watts

Chefs and cookbook authors Dolly McRae and Annie Watts forage for wild ingredients near their home in Port Alberni, BC. While Annie goes commercial fishing at night, Dolly gathers wild crab apples, kelp, and wild cherries. The mother/daughter team collaborates to create a traditional community feast over an open fire.

#291009-NR15 \$99

Northwest Territories Caribou: Pierre LePage

Chef Pierre LePage has a busy restaurant and catering business in Yellowknife. He forages for blueberries, fireweed, and morel mushrooms, and acquires both caribou and muskox meat, which highlights a shared outdoor meal.

#291010-NR15 \$99

Cowichan Valley Mule Foot Hog: Brock Windsor

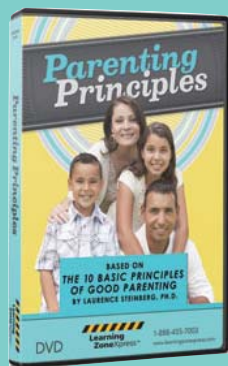

Chef Brock Windsor utilizes only local ingredients in his restaurant. Together with medicine woman Della Rice Sylvester, he combs the rainforests in Cowichan Valley, BC for blackberries, huckleberries, and lobster mushrooms. He combines these with his own domesticated wild ingredients like nodding onion, Jerusalem artichoke, and a smoked mulefoot hog.

#291011-NR15 \$99

Prince Edward Island Lobster: Ilona Daniel

Chef Ilona Daniel travels Prince Edward Island with her Mi'kmaq friend foraging for razor and bar clams, oysters, lobster, sea lettuce, and pin cherries. She builds a sandpit steam oven with rocks and eelgrass on PEI's shores, and then buries the gathered ingredients in the sand where they slowly cook to perfection.

Family Time: W5

Grades 9 – Post Sec 20 min 2014 CTV

Ten-year-old Mason Lang and his 5-year-old sister, Madison, live with a burden that is rife with stigma and shame. Their father is in prison. It's a problem they share with about 180,000 Canadian kids who also have a parent in prison and who must endure the isolation and often guilt by the association of having a parent who has broken the law. But a unique and innovative program in southern Ontario is offering support to both the kids and their incarcerated fathers. FEAT, which stands for Foster, Empowering and Advocating Together, is a non-profit organization that helps to keep kids, mothers and their jailed fathers connected as a family. Founded by the father and daughter team of Derek and Jessica Reid, the goal of FEAT is to keep families together even while separated. Ultimately, they hope strengthened family ties will give offenders a reason to avoid reoffending once they are released.

India's Shame: W5

Grades 11 - Post Sec 20 min 2013 CTV

India is a country rich with contrast. Here old meets new. Poverty grinds against prosperity. Cultures mingle and clash. But exotic ancient India has run headlong into the rapidly growing economic powerhouse, where women have stepped out of traditional roles, resulting in harsh questions about their treatment which is considered to be among the worst in the world. Rape is common. Sexual assault goes unreported. The victim is often blamed, which the perpetrator walks free.

Recently the The UN High Commissioner for Human Rights said rape is a "national problem" in India, reflecting the abysmal treatment of

women in the country. And two rape cases focused international attention on the abuse and maltreatment.

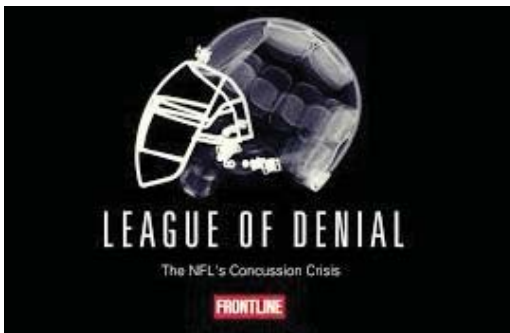

W5's Janis Mackey Frayer investigates the ugly and disturbing treatment of women in India, and the efforts to confront the national problem.

Essential Automotive Tasks Series

Grades 9 – Post Sec 3 discs 25 min each 2014 CC Films Media Group

Fuel filter replacements. Starter draw tests. Brake rotor resurfacing. When an automotive student becomes a working automotive technician, some repair jobs are going to roll into the shop more frequently than others. Each program in this three-part series presents a collection of step-by-step tutorials that show how to perform some of the most common tasks an automotive professional will experience. Led by a veteran, ASE-certified instructor, segments also take some time to teach the theory behind the systems being repaired. Whether in preparation for NATEF/ASE exams, or for life on the job, this series is an indispensable resource for aspiring technicians, and a vital tool for instructors dealing with heavy class loads.

Driver Education

Maneuverability Made Easy

Grades 9 – Post Sec 12 min 2013

Films Media Group

Safe driving doesn't depend on natural talent or good luck: it depends on specific skills that can be learned, practiced, and mastered. Using five cones and a standard 9x20-foot driving course, this video takes viewers step-by-step through the proper technique for maneuvering a vehicle front-first and rear-first into a parking space. Maneuverability Made Easy is an indispensable tool for every careful driver - and particularly for students practicing for the maneuverability portion of their driver's license test.

Streaming Price (3 year term): Single School – K-12: \$165

Playlist Package Collections

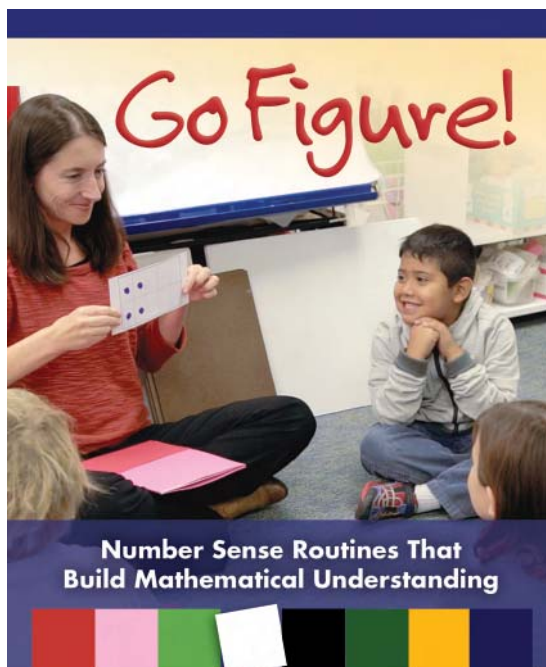

Each of our PLAYLISTS is a package of programs that is hosted by McIntyre Media and streamed directly to your institution. They are HIGHLY DISCOUNTED selections of some of our most popular programs. Each fits a particular theme/curriculum unit. Call for information.

Custom Playlist Packages

You create your own playlist. It's simple! You select the titles you want. Call us and we will set it up. Within a short time, you, your institution, faculty and students will have access to the programs you have purchased.

Hosting

Let us host the content for hassle-free anytime, anywhere delivery. We can also host 3rd party content. Or if you have produced content and want to access it in an easy to use interface, this is a great option for you.

Go Figure! Number Sense Routines that Build Mathematical Understanding

For Grades K-5 Teachers 2014 99 min Stenhouse Publishers

In *Go Figure!*, Jessica Shumway takes viewers into first-, second-, and fourth-Grades classrooms where teachers have set up daily opportunities for developing, nourishing, and expanding students' number sense. See number sense routines in action as Jessica, author of *Number Sense Routines*, and three other teachers engage students in these quick yet numerically rich experiences that, over time, help build a strong foundation for understanding mathematics.

Watch how Jessica, Catherine Ermer, Jalyn Kelley, and Camilla Webb make in-the-moment decisions about where to take a mathematical conversation and reflect on their instructional planning and students' learning. View children engaging in playful discussions about numbers. Hear Jessica answer teachers' frequently asked questions about implementing number sense routines. And learn how to implement and enrich your own mathematics teaching through these powerful routines. #000166-NR15 \$175

Streaming Price (3 year term): Single School – K-12: \$262.50

Playlist Package Collections

Each of our PLAYLISTS is a package of programs that is hosted by McIntyre Media and streamed directly to your institution. They are HIGHLY DISCOUNTED selections of some of our most popular programs. Each fits a particular theme/curriculum unit. Here's a sample of one of our PD Collections. Or create your own. Call for information.

PD Early Learning Playlist

A wonderful collection of Teacher Education programs produced by teachers for teachers.
